Long Description

Always delicious, and now completely touch-free!

Introducing Touchless Brewing with the Remote Brew app for Bean-to-Cup coffee makers.

Enjoy your favorite coffee or specialty beverage with NEW touch-free technology from Keurig®! Freshly ground beans, brewed and delivered from the convenience of your phone. Once the app is installed, just scan the QR code on your coffee maker, choose your beverage, customize, and enjoy!

Through a simple to install Bluetooth® kit, your Bean-to-Cup coffee maker can connect to the Remote Brew app.
