## **Safety Information & Equipment Specifications**

Your safety is extremely important to us. To avoid personal injury or damage to the equipment and its surrounding areas, it is **imperative** that you read and understand the safety information outlined in this section before proceeding with the installation and operation of this equipment.

## Safety Symbols

The following symbols are used throughout this publication:

Indicates an electrical shock hazard.

Indicates a potential safety risk, or a risk of damage to equipment and/or its surroundings.

Indicates important information that must be understood before proceeding.

Indicates an important note or useful tip.

#### **Important Safeguards and Precautions**

- This equipment is designed for indoor use **<u>ONLY</u>** and must *never* be installed outdoors.
- This equipment requires a 120-Volt 20-Amp wall outlet like the one shown below:

- The installation of this equipment <u>must</u> comply with <u>all</u> municipal, state/provincial, and federal electrical and plumbing codes.
- Installation and servicing of this equipment must <u>only be performed by qualified</u> <u>personnel</u>. Do not attempt to install or service this equipment if you are not qualified as it may result in personal injury. There are no user-serviceable parts inside the equipment.
- Do not use an electrical extension cord or power bar.
- This equipment must be installed in a location with an ambient temperature between 5°C - 35°C (40°F - 95°F).
- The main water supply pressure must be between a minimum of 20psi and a maximum of 100psi.
- The temperature of the main water supply entering the machine must not exceed 49°C (120°F)
- This equipment must be positioned so that the wall plug and the main power switch are both easily accessible.
- Do not connect this equipment to a voltage supply other than the voltage indicated on the serial number decal.
- Do not immerse this equipment, or any part of this equipment, in liquid.
- Do not install the equipment in an area where water spray is present.
- This equipment must be installed securely on a level surface. If it does not appear to be a stable location, select another installation location.
- Leave a **minimum of 2" (5cm)** of space all around this equipment for proper ventilation.
- Keep hands clear of the dispensing area at the front of this equipment. Liquids being dispensed are extremely hot and can cause severe burns.

- <u>Never</u> disconnect this equipment from the wall outlet by pulling on the service cord, and never use this equipment if the service cord is damaged.
- If the service cord is damaged, <u>it must be replaced with a new service cord</u> that is available from your distributor or the manufacturer of this equipment.
- <u>Never</u> circumvent the safety features incorporated into the equipment. They are there for your protection and <u>should never be disabled or bypassed under any</u> <u>circumstances</u>.
- <u>Always</u> switch the power off and disconnect the service cord when cleaning the interior of this equipment. Components inside this equipment can cause electrical shock resulting in personal injury.
- Use caution when servicing the water tank or any of its components the water in the tank and the tank components may be extremely hot and can cause severe burns.
- Use caution when working inside this equipment as there may be sharp edges on some components that can cause cuts.
- To prevent electrical shock, remove all jewelry (rings, watches, etc.) when servicing this equipment.
- <u>Use only original equipment manufacturer replacement parts</u>. Unapproved replacement parts can result in personal injury, fire and/or further damage to the equipment.
- Do not allow children to access this equipment. They are not aware of the potential dangers that exist.
- The Urnex TABZ Z61, Urnex SuperGrindz A01 and Urnex RINZA products are the <u>only</u> cleaning products approved by VKI Technologies for cleaning the brewer. the grinder and the whipper components. These products have been thoroughly tested and will not damage machine components. The use of other products may damage components and will void any remaining warranty on the damaged components.
- <u>Never</u> use ammonia-based cleaners on the surfaces of this equipment as they will become discolored and/or damaged permanently. Use mild cleaning products, such as dish soap.
- Do not lean on, push or shake the equipment as there is a risk that it can tip or fall, or cause water to overflow and contact electrical components creating a shock hazard.
- **Do not** operate the equipment with the rear panel removed.

Unauthorized modifications made to this equipment can result in serious personal injury and/or damage to the equipment and its surroundings (including a risk of fire), and voids all warranties and safety certifications/listings.

#### **Specifications**

Valtage Deting	120 Valte AC @ 60hz (120 Valt Madal) 20 Amp Dlug	
Voltage Rating	120 Volts AC @ 60hz (120 Volt Model) – 20 Amp Plug

## Capacities

Coffee Hopper 1	6 lbs (2.72 kg)	Position 1: 1 lb (0.45 kg)	Position 2: 2 lbs (0.9 kg)
Coffee Hopper 3	3 lbs (1.36 kg)	Position 1: 0.5 lb (0.22 kg)	Position 2: 1 lb (0.45 kg)
Coffee Hopper 2	6 lbs (2.72 kg)	Position 1: 1 lb (0.45 kg)	Position 2: 2 lbs (0.9 kg)
Powder Hopper 1	4 lbs (1.8 kg)		
Powder Hopper 2	4 lbs (1.8 kg)		
Powder Hopper 3	3.5 lbs (1.6 kg)		
Water Tank	2 gallons (7.6 litr	es)	
Waste Bin	Approximately 50	) cups (12-oz)	

## **Equipment Dimensions**

Height:	35.0" (89 cm)
Width:	20.5" (52 cm) with door closed
	24.0" (61 cm) with door open
Depth:	27.0" (69 cm) with drip tray
	24.5" (62 cm) without drip tray

## **Installation Dimensions**

Height:	42.0" (107 cm)
Width:	26.0" (66 cm)
Depth:	29.0" (74 cm)

Any references made in this manual to coffee blends, powder products and beverages are for example purposes only. The actual products used in the equipment may differ from the examples used in this manual.

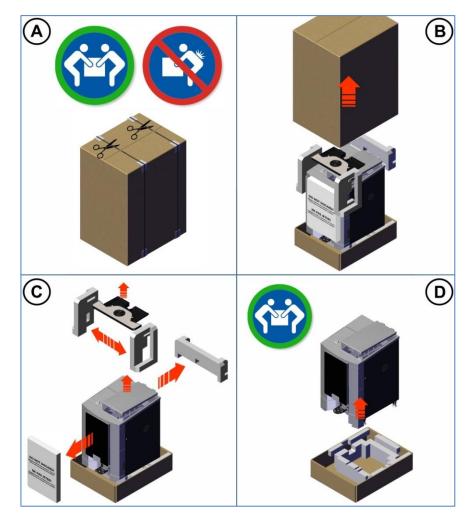

## SECTION 2

## Setting up the Equipment

#### Unpacking

Prior to signing for the delivery, check the shipping carton for damage. Indicate any damage on the delivery slip and have the delivery driver sign to acknowledge the damage. Damages during shipping must be claimed with the carrier, and not with VKI Technologies.

- 1. Cut the straps on the outside of the box (A).
- 2. Lift the top carton (B).
- 3. Remove the two side foam supports and remove the cup stand assembly secured between them (C).

4. Remove the front and rear foam supports (C).

Do not discard the front foam support as it must be installed over the machine's screen to protect it during transport.

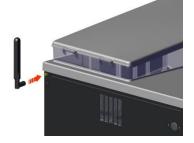

5. With the **help of a colleague**, lift the coffee maker off the base of the packaging (D) and place it onto a workbench or cabinet. **Do not attempt to lift the machine by yourself.** 

<u>DO NOT</u> lift the coffee maker by placing your hand underneath the front door. It is not designed to support the weight of the machine, and serious personal injury and/or damage to the unit may occur.

6. Remove the keys and the Telemetry Antenna from the cup stand. Install the telemetry antenna to the round connector at the top right corner on the rear of the machine.

7. Slide the residue chute into the slots at the bottom of the machine.

8. Remove the shipping tape and protective film from the outside of the machine and from the stainless steel drip tray grill.

Keep all packaging material in case the equipment must be transported or shipped. When transporting the unit for installation, leave it on the base of the packaging to reduce the risk of damage to the levelers.

## Unlocking the Front Door and the Waste Bin

The Eccellenza Momentum<sup>™</sup> uses a multi-position lock to lock the waste bin in place and to lock the front door.

**To lock both the front door and the waste bin**, insert the key and turn it to **position 1**. While in this position (with everything locked), the key can be removed from the lock.

To unlock the waste bin without unlocking the front door of the machine, insert the key and turn it to **position 2**, as shown. If the key is removed while in position 2, the waste bin will remain unlocked so that anyone can empty the waste bin. If the machine is installed in a public location, we recommend removing the key in position 1, to leave the waste bin locked.

2

**To unlock both the front door and the waste bin**, insert the key and turn it to **position 3**. When the key is in this position, it **cannot** be removed from the lock.

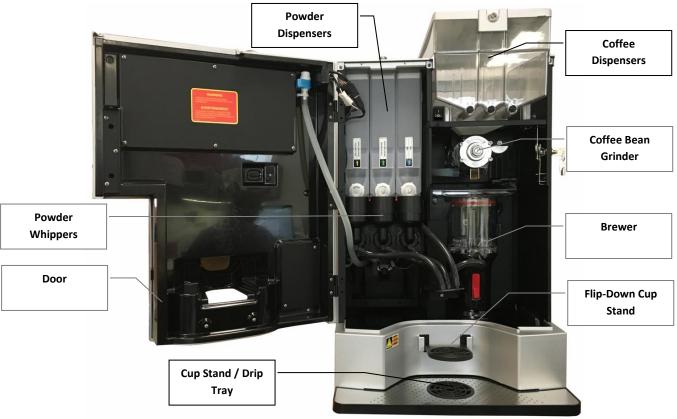

## **Cup Detection**

The Eccellenza Momentum<sup>M</sup> is equipped with a cup detection system, which is activated by default. If a cup is not detected on the cup stand, it is not possible to dispense a beverage. For more information about enabling or disabling the cup detection system, go to <u>page 41</u>.

## **Equipment Overview – Exterior**

**Equipment Overview - Interior** 

#### **Installation Precautions**

This equipment is designed for indoor use only and must <u>never</u> be installed outdoors.
Avoid using extension cords and power bars when connecting this equipment to a power source.
Installation of this equipment must comply with all local, state/provincial and federal codes and regulations. It is the <u>sole responsibility of the installer</u> to research and to comply with these codes and regulations.
This equipment must be installed on a dedicated <u>20 amp outlet</u> . Do not install other equipment on the same outlet/circuit.
Ensure that the equipment is level and stable. This is done by adjusting the levelers (legs) at the bottom of the machine. Also, do not block any of the equipment's ventilation ports.
Leave room at the rear of the equipment for the plumbing fitting and water hose, as well as for adequate ventilation. Leave ample room above the equipment to open and fill the product hoppers.

#### Water Connection

Installation of this equipment must comply with all local, state/provincial and federal codes and regulations. It is the <u>sole responsibility of the installer</u> to research and to comply with these codes and regulations.
The temperature of the water entering the machine must not exceed 49°C (120°F).

Accessibility to shut-off valve(s) must be provided and explained to customer in the event water supply to brewing equipment must be shut off.

For multi-unit locations whereby the main water conduit is supplying water to more than one unit (including water coolers), a separate in-line shut off valve must be installed onto each individual equipment unit.

The Eccellenza Momentum<sup>™</sup> is factory-equipped with an integrated backflow prevention check valve. An additional external backflow prevention system is not necessary.

#### Water Filter

We recommend the use of a high quality water filter which eliminates most odors present in water, and reduces the amount of particles entering the water tank.

When installing a water filter, refer to the water filter manufacturer's installation instructions.

When the filter is installed or replaced, make sure to write the installation date in the provided area on the filter cartridge. Always follow the manufacturer's recommendations for filter replacement intervals.

## **Starting the Equipment**

The main power switch for the Momentum<sup>M</sup> is located at the rear of the machine, on the right side. To switch the power ON, toggle the power switch to the "I" position.

The Eccellenza Momentum<sup>™</sup> now goes through a quick initialization process, after which, it is ready to be used.

#### Service Power Switch

The Eccellenza Momentum<sup>™</sup> is also equipped with a secondary power switch (Service Switch) inside the machine, to the left of the coffee dispenser. This switch can be used to shut off the machine power should the main power switch be inaccessible.

#### The Touch Screen

0	Available beverage list
0	Hot Water option
€	Vending price and credit information (if applicable)
4	Language selection
6	Notifications
6	Shows currently selected beverage
0	Coffee blend selections
8	Cup size and coffee strength selection area
Ø	Start button - begins beverage preparation cycle
0	QR Code for Keurig <sup>®</sup> Remote Brew App (Touchless)

#### Selecting and Dispensing a Beverage Using the Touchscreen

- 1. Place your cup or mug on the cup stand at the bottom of the door and select the type of beverage desired.
- 2. Select the coffee type for the beverage that was initially selected.
- 3. Chose the cup size and the strength (if applicable) for the beverage that you selected.
- 4. Make your payment (if the Momentum<sup>™</sup> is in vending mode).
- 5. Press the **'POUR'** button to begin the beverage preparation cycle.
- 6. Remove your cup or mug, and enjoy your delicious beverage!

#### Selecting and Dispensing a Beverage Using Keurig<sup>®</sup> Remote Brew App (optional Touchless Kit required)

- 1. Place your cup or mug on the cup stand at the bottom of the door.
- 2. Using your camera app on your iPhone or Android smart phone, scan the QR code that appears on the screen of the machine.

Your phone will be directed to either the Apple App Store or to Google Play where you can download and install the "Remote Brew" App.

*If the app is already installed on your smartphone, scanning the QR code opens the app on your phone.* 

- 3. Tap the options icon to change the language English, French and Spanish are available.
- 4. Tap the yellow bar on the 'Remote Brew' app.
- 5. Select the desired beverage.
- 6. Select the coffee type (if applicable).
- 7. Chose the cup size and the strength (if applicable) for the beverage that you selected.
- 8. Tap the 'Brew' button to begin the brewing or dispensing cycle.
- 9. Remove your cup or mug and enjoy your delicious beverage!

The application layout may differ slightly depending on the type of smartphone being used and/or the smartphone screen size.

#### Filling the Coffee Bean Dispensers

The Momentum<sup>™</sup> comes pre-configured as follows: *Coffee 1 – French Roast, Coffee 3 – Decaf, Coffee 2 – Colombian* Should you prefer a different configuration, you can reconfigure the coffee blend names it in the 'Setup' menu (<u>see page 68</u>).

Do NOT pack the coffee beans into the dispensers!

- 1. Unlock and lift the coffee lid
- 2. Fill the dispensers with the desired coffee beans.
- 3. Close and lock the coffee lid.

If the dispensers are completely empty, you need to make a few vends until the dispensers are properly primed.

Any ingredient references made in this manual are for example purposes only. The actual products used in the equipment may differ from the examples used in this manual.

## **Filling the Powder Dispensers**

the whipper system!

The Momentum <sup>™</sup> comes pre-configured as follows: Powder 1 – Hot Chocolate Powder 2 – French Vanilla Powder 3 – Milk*
Do NOT pack the powder into the dispensers! *Do NOT use coffee whitener instead of milk as it may create blockages in

To fill the powder dispensers, unlock and lift the main powder lid, remove the individual lid and fill the respective dispenser with the desired powder product. Once filled, **re-install the individual lid back onto the dispenser** and proceed to the next dispenser, if required.

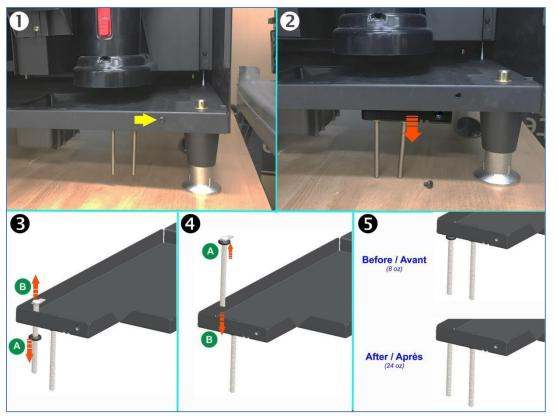

If the dispensers are completely empty, you'll need to make a few vends until the dispensers are properly primed. During this time, you may notice dispenser-related errors on the screen - these errors will clear automatically once the dispenser is primed.

Any ingredient references made in this manual are for example purposes only. The actual products used in the equipment may differ from the examples used in this manual.

## Setting the Cup Stand Overflow Detection

By default, the overflow detection for the cup stand is set at approximately 8-oz. This means that when 8-oz of liquid have accumulated in the cup stand, the "Empty Cup Stand" message appears on the screen. To increase the amount of liquid in the cup stand to 24-oz before the message appears, remove the thick o-ring from the bottom of the detector on the left side, and move it to the top (**between** the connector and the metal support), where it will act as a spacer and raise the detector.

## Installing a Cup Stand Drain

Alternatively, you can drill open the drain fitting at the rear of the cup stand to install a drain hose that can be routed either into a large waste bin under the cabinet (easily done if a waste chute system is used) or into an actual drain.

#### **Checking Water Temperature**

To check the current water temperature in the hot water tank, remove and re-install the waste bin. The machine will display the water temperature in the lower center of the screen during reinitialization.

#### **Initial Adjustments**

#### Change PINs for the Operator and Administrator

To prevent unauthorized access to the Momentum<sup>™</sup> programming, we highly recommend that you change the default PIN (Personal Identification Numbers) for both the Operator and Administrator.

Both PIN numbers can be changed in the 'Security' menu (see page 88).

#### Setting the Date and Time

Enter the set up of the machine and <u>set the correct date and time</u>. This is necessary when using the beverage counters, setting the Energy Savings features, tracking data that the equipment has collected and when reports are sent to the operator of the equipment.

The date and time settings are found in the 'General Settings' menu (see page 41).

#### Water Levels

The Momentum<sup>™</sup> is factory preset to dispense 12-oz, 16-oz, and 20-oz cups sizes. The water levels can be fine-tuned in the 'Setup' menu (<u>see page 65</u>).

#### Gram Throws

You will also need to calibrate the gram throws for the coffee blends and powder types you will be using in the equipment. Calibration ensures that the equipment delivers the best tasting beverage possible.

Product settings are adjusted in the 'Setup' menu (see page 65).

#### Beverages

The Momentum<sup>™</sup> is preset with all of the beverages and beverage options (such as cup sizes and strengths) enabled.

Beverage options are set in the '**Setup**' menu (<u>see page 65</u>).

#### Notifications

The Momentum<sup>™</sup> can be configured to provide notifications about usage and consumption, counters, faults and messages, etc.

To configure the 'Notifications' feature, go to the 'Network' menu (see page 57).

The following symbol is used to identify a *"touch"* location on the machine's touch screen.

#### **Clearing Error and Reminder Messages**

Should an error or reminder message be triggered, the error or message is displayed at the lower left of the screen. In the example below, the message reads "**Please reinsert waste bin**". However, in our example, there are three messages present, as indicated by the number "**3**" in the upper right corner of the screen. Messages are stacked in the order in which they occur.

In this case, the waste bin has been removed and its presence is not detected. The waste bin must be replaced to clear this message.

In a case where multiple messages are present, after clearing the first message, any subsequent messages are displayed (one at a time) until they are all cleared.

If a "Call for Service" error is displayed, you need to go to the "System Status" menu to get more details about the error.

#### System Status Report Screen

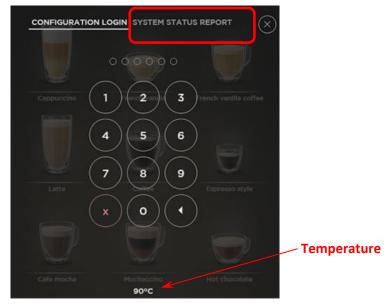

The System Status Report screen provides a quick snapshot of the equipment's serial number and other important information. If contacting VKI for technical assistance, you may be asked to send a photo of the **System Status Report** screen as it may prove useful during equipment troubleshooting.

To access the System Status Report screen:

1. Touch and hold the upper left corner of the screen for five seconds.

2. A screen with a numeric keypad opens. At the top of the screen, tap on the "System Status Report" option.

You can also check the temperature of the water in the hot water tank at any time by accessing this screen.

- 3. The **"System Status Report**" screen opens to provide a quick snapshot of the machine's most important information. This includes:
  - the serial number and other unique identifiers
  - current temperature
  - some maintenance information
  - active errors and logs
  - software, firmware and OS information
  - product counters
  - resource usage

# SECTION 3

## **Configuring the Equipment**

The following symbol is used to identify a "touch" location on the machine's touch screen.

## Accessing the Configuration System

To access the equipment Configuration System:

1. Touch and hold the upper left corner of the screen for five seconds.

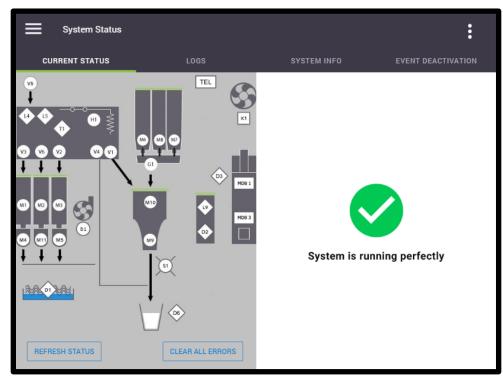

2. A numeric keypad opens and you are required to enter your personal identification number (PIN).

The default PIN for the **Operator** is '**345678**'. The default PIN for the **Administrator** is '**234567**'. See the '**Security**' section (<u>page 88</u>) for more information.

3. If the correct PIN is entered, the **'System Status'** screen shown below opens. If an incorrect PIN is entered, it remains on the keypad screen.

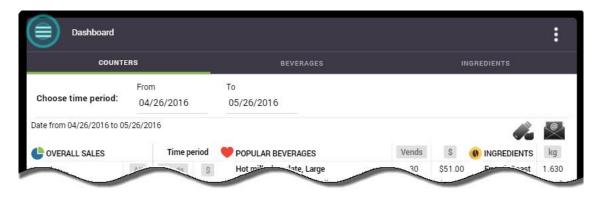

If logging in as an Operator, all menus will be visible as you have full rights/access to the programming mode. If logging in as an Administrator, your rights/accesses may be limited and some menus may not be accessible.

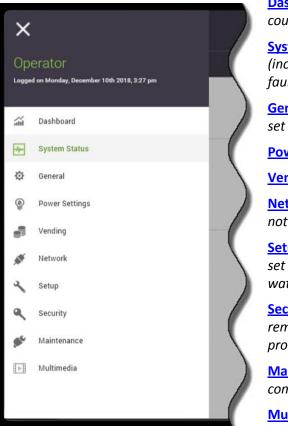

Your PIN must remain confidential, therefore you should never disclose your PIN to anyone.

#### **Programming Menu Structure**

The Setup menu drop-list can be viewed at any time by touching the triple-bar icon on the upper left side of the screen. When the drop-list is open, simply touch the required setting on the list to open the corresponding configuration menu.

#### Menu Drop-List Overview

<u>**Dashboard</u>** - displays statistics on consumption, counters, and sales.</u>

<u>System Status</u> - displays the status of the machine (including current faults) and provides logs of previous faults.

<u>General Settings</u> - set language, units and date/time, set speaker volume and screen brightness.

**<u>Power Settings</u>** - set energy saving features.

Vending / Pricing - enable vending and set pricing

<u>Network</u> - configure network connections, email notifications and telemetry.

<u>Setup</u> - enable and rename products and beverages, set recipes and timings, set temperature, fine-tune water settings, and product calibrations.

<u>Security</u> - assign/change PIN numbers, and grant or remove access to individual sections of the machine programming.

<u>Maintenance</u> – perform maintenance and test each component individually for functionality.

Multimedia – load custom images and video

All of the menus and tabs in this section will only be visible to anyone that logs in as an <u>Operator</u>. If you log in as an Administrator, you may <u>not</u> have access to all of these menus and tabs. See the "Security" section (<u>page 88</u>) for more information.

#### Sub-Menu Tabs

Some of the settings in the drop-down list also contain sub-menus. If you want to view a submenu, select (tap) one of the sub-menu tabs at the top of the screen.

If multiple tabs are available, the currently active tab is identified by a green line directly beneath the sub-menu name, which also appears white instead of gray.

#### Exiting the Setup

To exit the Setup at any time, touch the three dots on the top right corner. This opens the "Log Off" tab that closes the Setup.

								Log off

#### Dashboard

The Momentum<sup>™</sup> 'Dashboard' displays statistics on counters, consumption, and sales (vending).

#### Counters

The 'Counters' tab displays a view of the internal counters in the machine. The counters provide a snapshot of the machine's consumption and sales. *Please note that these counters are displayed based on the time period chosen and are non-resettable.* 

COUNT	ERS			BEVERAGES		ING	REDIENTS

- **1** *Time Period:* allows you to select the time period for which to display the counters or statistics.
- **Overall Sales:** displays the overall beverage sales (in cups) for the selected time period. Also displays sales information for 'Popular Beverages'.
- **Save or Email Information:** allows you to save the information to a USB flash drive, or to send it by email (in Microsoft Excel format).
- **Ingredients:** displays the overall product sales (by weight) for the selected time period.
- **6** *Maintenance:* displays how many 'coffee' or 'powder' vends remain before an automated brewer rinse or powder rinse request is activated.
- **6** *Cashbox:* displays the 'Cashbox' information (if applicable) for the selected time period.

To specify the time period for which you want to view the data:

1. Tap on the "From" field and enter the desired month, date and year and tap "Done".

Hot milk chocolate		3	\$5.10	0	\$0.00	0	\$0.00	3	\$5.10	0	\$0.00

If you would prefer to view the results as a Daily, Weekly or Monthly average, you can change the parameter in the **'Show result by average'** field.

4. Tap on the green "**down**" arrow beside any of the beverages shown to expand the selections for a more thorough breakdown of the data shown.

For example, the "**Coffee**" field shows 6 cups. Tapping on the green "down" arrow beside 'Coffee' shows you that of the 6 cups brewed, 4 were French Roast, 1 was Colombian and 1 was House Blend. This procedure can be performed on any of the beverages listed.

#### Emailing Data or Saving it to a USB Flash Drive

All of the data available in the Momentum<sup>™</sup> Dashboard can either be saved to a USB flash drive, or sent to an email address as an attachment (if an email address has been set in the "Network" menu). Whether saved to a USB drive or sent by email, the attachment is in Microsoft Excel format.

To save the data to a USB drive, tap on the USB drive icon on the left. To send it by email, tap on the email icon (envelope) on the right, and follow the prompts on the screen.

#### **System Status**

The 'System Status' screen displays the status of the machine (including current faults) and provides logs of previous faults. The equipment system info (such as serial number, firmware version, IP address, etc.) and maintenance functions are also found here.

#### **Current Status**

The machine's current operating status is displayed with an easy-to-read graphic. If the system is functioning properly (with no faults detected), a green checkmark is displayed (see image below).

## Fault Codes

Should a fault be present, it is identified in the "Current Status" tab, under the "**System Status**" menu, using one of the codes from the list below. The right section of the screen shows the component code (and pending component codes) and a brief description of the fault.

In the example above, a fault has been detected with "**G1**", which is the grinder. After correcting the error, tap the "**Clear All**" button. The screen then displays a green checkmark with the "System is running perfectly" message beneath it. In some cases, the error may re-appear when the machine is placed back in normal operation, at which point a more thorough troubleshooting is required.

Fault codes <u>must be manually cleared</u> (in this menu) after the fault has been corrected, otherwise the error message will continue to appear on the main screen.

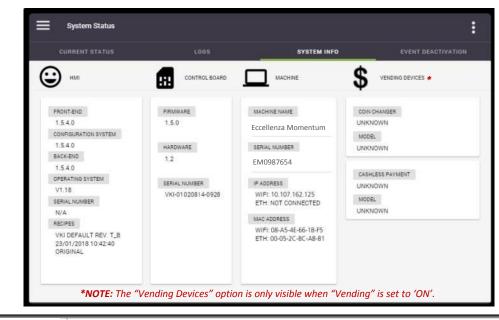

#### Logs

The **'Logs'** tab shows the fault history of the equipment in list form (from newest to oldest). Codes marked in Red identify that servicing was required. Yellow-marked codes warn of potential faults. Codes in green identify that the fault was corrected, and when it was corrected.

	System Status			:

D3	21 days ago	The machine door is open.		

#### System Info

Information about the equipment, such as serial number, firmware versions, network and MAC address, vending devices, etc., can be found in this menu.

The "Machine Name" field can be edited. To do so, simply tap on the machine name and the keyboard appears, allowing you to rename the machine.

## **Event Deactivation**

The Event Deactivation tab allows you to deactivate any of the error messages that can potentially appear should the system detect a fault.

Deactivating error messages allows the equipment to continue to operate with a defective component, as a fault notification is <u>not</u> displayed. This, in turn, may cause further damage to the equipment and/or its surroundings.

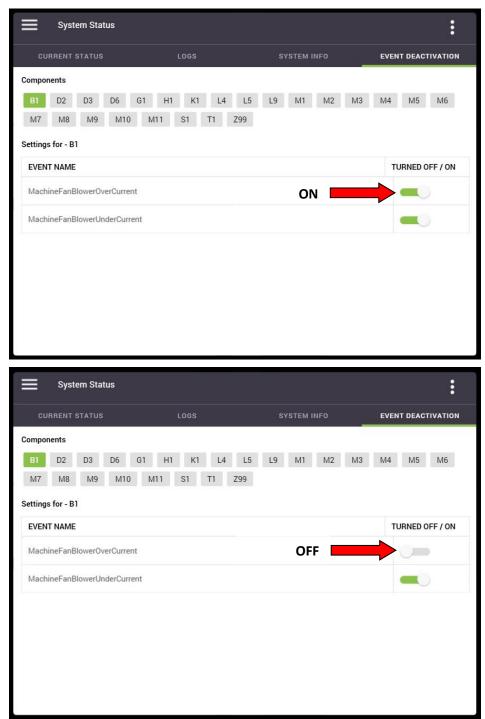

To deactivate a particular error message:

- 1. Select the required component from the list of components. The table below identifies the component code.
  - a. Once a component is selected, the list of related error messages for this component is displayed under the "**Event Name**" heading.

2. Under the "**Turned Off / On**" heading at the right, turn off the error to be deactivated using the slider (green slider = ON, gray slider = OFF).

3. Repeat the procedure for any other components, if necessary.

## **General Settings**

The 'General' screen is where you can configure the waste chute system, the primary and secondary interface languages to be used, units of measure (Metric or U.S. Standard) and the date and time, as well as the display and sound settings. You can also change the frequency at which the brewer and powder rinse cycles are triggered in the "Task Schedule" tab.

## Installation

## Waste Management (Waste Chute)

If the machine will be equipped with the optional waste chute kit, you'll need to come to this tab and enable the **'Use Waste Chute'** option. Doing so will make the wiper move from right to left, guiding the spent coffee grounds into the waste chute instead of the waste bin.

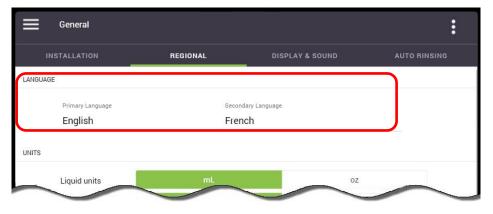

General			:
INSTALLATION	REGIONAL	DISPLAY & SOUND	AUTO RINSING
WASTE MANAGEMENT			
USE WASTE CHUTE			
CUP DETECTION			
	$\sim$	$\sim$	

#### **Cup Detection**

The Eccellenza Momentum is equipped with a cup detection system. By default, this system is enabled. Touch the slider in this menu to disable the cup detection system.

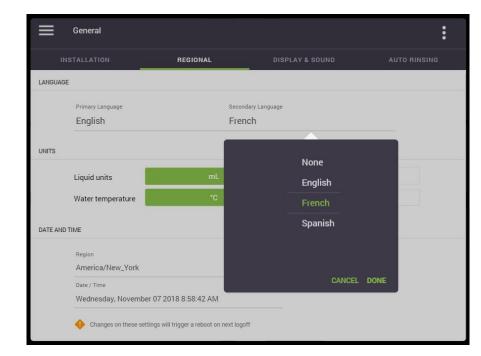

## Regional

Language

The Momentum<sup>™</sup> comes pre-loaded with three different languages (English, French and Spanish), however **only two can be active at one time**. In this tab, you can define the Primary Language, which will be the default, and the Secondary Language, which will be selectable by the user.

To change the language settings, select either the Primary or Secondary setting, choose the required language from the list, and select **'Done'**. Note that you can also select **'None'** as the secondary language (*see example below*) should you want only one language available.

### **Units of Measure**

The units of measure displayed by the Momentum<sup>™</sup> can be set in this tab. Liquid units can be set to either milliliters (ml) or ounces (oz), and the temperature can be set to either °C or °F.

IN	ISTALLATION	REGIONAL	DISPLAY & SOU	IND	AUTO RINSING
LANGUAG	E		_		
	Primary Language	Seco	ndary Language		
	English	Fre	nch

DATE AND	TIME				
	Region				
	America/New_York				
	Date / Time				
	Wednesday, November 0	7 2018 8:58:42 AM			

To simplify weight settings for coffees and powders, the Momentum<sup>™</sup> only displays the units as grams when they are being set.

## Date and Time

If the 'Telemetry' option is activated, the time and date will be set automatically.

To adjust the date, time and time zone setting, first, set the **'Region'** (Time Zone) in which you are located, and then select the **'Date and Time'** feature to open the scroll list.

	General				:

### **Display and Sound**

This screen is used to set the volume level (available **only** when speakers are used) and the brightness of the screen.

### Auto Rinsing

## Counter Trigger

This screen is used to set the frequency at which the notifications for **mandatory** Brewer Rinse and Powder Rinse cycles are triggered. By default, the Brewer Rinse is set to 500 cups, and the Powder Rinse is set to 75 cups.

≡	General			:
	INSTALLATION	REGIONAL	DISPLAY & SOUND	AUTO RINSING
COUNTER	TRIGGER			
	Brewer Rinse Remaining before rinse	Rinse now	Powder Rinse Remaining before rinse: 75	Rinse now
	Min: 250	500 мак: 999	Min: 1 75	Max: 150
	. A I	inse operation will be required if the se	t value is lower than the current remaining	g count.

To change the frequency, tap on the desired option and input the new setting. Once you are finished, tap the **'Done'** button to save your new setting.

Gener	ral				:
			DISPLAY & SOL	IND AUTO RINSING	
COUNTER TRIGGER					
	Brewer Rinse Remaining before rinse : 500 Mm: 250 5000	6 7	Powder Rinse	Rinse now 75 Max: 150 rent remaining count.	
PERIODIC TRIGGER					

## Periodic Trigger

A second option is also available for the auto-rinsing feature. It can now be triggered to activate at a pre-set time of day.

	$\sim$	
PERIODIC TRIGGER		
	Start Rinse Time	Period
	07:00	24 hours

The following can be configured in this menu:

- **Enable** enable (green) or disable (gray) this feature.
- Start Time set the time of day that triggers the auto-rinsing.
- Period set the frequency at which the auto-rinse triggers (every 24 or 48 or 72 hours)

## **Power Settings**

The **'Power Settings'** screen is used to set the energy saving options available in the Momentum<sup>M</sup>.

Power	r Settings					:
SCREENSAVER						
ENERGY SAVING						
WATER TEMPERAT			Temper	ature F° 140		
WAKE UP ON TOUC	H

		UNABLE E				
		Turn on Machine 7:15 AM				
		Turn off Machine 5:30 PM				

#### **Energy Saving**

To conserve energy, the Momentum<sup>™</sup> can be set to go into an 'Energy Saving' mode during preset periods of time. While in Energy Saving mode, only the machine screen functions to advise users that the machine is in Energy Saving mode. All other components are disabled, including the heating element.

1. Tap the 'Energy Saving' slider to activate the Energy Saving mode.

# Vending (Cashless Pay)

The Momentum<sup>™</sup> is currently only compatible with a Coin Changer unit or a Cashless option (card reader). <u>Consult the manufacturer documentation</u> for configuring these devices.

### General Tab

GENERAL	BEVERAGES	
Force Vending		
OFF: The force vend	feature is disabled and the unit always ret	turns credits when escrow pushe
4 Cashbox Full Notifica	tion 💶	
Cashbox Full Value	Last date cashbox was emptied	
5 \$220	6 Thursday, May 26 2016 4:40 AM	RESET CASHBOX
	2 Force Vending OFF: The force vend Cashbox Full Notifica Cashbox Full Value	<ul> <li>Parce Vending</li> <li>OFF: The force vend feature is disabled and the unit always ref</li> <li>Cashbox Full Notification</li> <li>Cashbox Full Value</li> <li>Last date cashbox was emptied</li> </ul>

The **Vending Mode** slider **1** enables or disables the vending functions - vending is enabled when the slider is green.

You can also enable the 'Force Vending' option 2, which when enabled, prevents people from using the Momentum<sup>M</sup> as a 'change maker'. This is usually done by inserting a \$1 or \$2 coin and then pressing the coin return button to have the machine dispense change in quarters. There are three possible configurations for this option:

- **OFF** the force vend feature is disabled and the unit will function normally.
- **SMART** the coin return feature of the changer is disabled when a \$1 or \$2 coin is inserted.
- **ON** the coin return feature of the changer is completely disabled.

The vending devices are also enabled and disabled in this menu. The **Coin Changer** <sup>3</sup> and/or **Cashless** 

(card reader)<sup>(3)</sup> options and can be enabled in this menu.

The Cashbox options are configured in this menu. These include:

- **Cashbox Full Notification** ④ a "Call for Service" message appears on the screen advising that the cashbox is full and requires emptying.
- The 'Cashbox Full Value' **5** can be set here. This is the value used to determine when the Cashbox Full notification appears. By default, it is set to \$220. Tap on the value to change it, if required.
- The last date the cashbox was emptied (reset) can be verified here **6**.
- Tapping this button 7 resets the cashbox total counter.

Section

## Network

The Network screen is used to configure the network connection and SMTP settings, as well as notification settings that allow the Momentum<sup>™</sup> to send email notifications concerning consumption, sales and faults/messages.

### WIFI

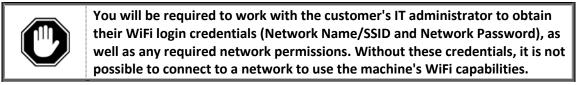

Should you want to establish remote communication with the Momentum<sup>™</sup>, you'll first need to enable the WiFi feature by tapping on the **'WiFi Connexion'** slider.

1. Once WiFi is enabled, the Momentum<sup>™</sup> begins scanning for any wireless networks in its vicinity.

	Network				:
	WIFI	SMTP	NOTIFICATIONS	TELEMETRY	REMOTE BREW
WIFI CONNE					
		Scar	nning Networks		
			₹ <sub>N</sub>		
					REFRESH WIFI NETWORKS LIST

2. When scanning is complete, all of the detected networks are listed on the screen.

	Network				:
	WIFI	SMTP	NOTIFICATIONS	TELEMETRY	REMOTE BREW
WIFI CONN					
Network	1				▼4 🐨
Network	2				₩.
Network	3				▼4 🐨
Network	4				₩
Network	5			RE	FRESH WIFI NETWORKS LIST
HIDDEN S	SID				

3. Select the network to which you want the Momentum<sup>™</sup> to connect, and then tap on the **'Connect'** button.

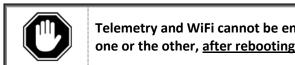

≡	Network				:

HIDDEN SSID	WPA	Enter SSID		

#### SMTP

To use the SMTP capabilities of the Momentum<sup>™</sup>, you need to have <u>both</u> a network connection <u>and</u> a dedicated SMTP server. Contact your company's or your customer's IT Department for more information about setting up an SMTP server. It may also be possible to use an online SMTP server provider, such as Gmail or Yahoo (see <u>page 61</u> for details).

**Only** after obtaining network access, the Momentum<sup>™</sup> can then be configured to upload notifications concerning consumption, sales and faults/messages directly to your SMTP server.

1. Tap on the 'Requires Authentication' slider to activate the SMTP feature.

	SMTP	NOTIFICATIONS	TELEMETRY
MTP CONFIGURATION			
SMTP Server		SMTP From	
smtp.exam	ple.com	eccellenzatouch@vkitech.com	
Use SSL	-		
Requires Auth	entication		
SMTP Username			
SMTP Password			

2. Enter the required information in the SMTP Server field, as well as your SMTP username and password, and then tap the **'Test Configuration'** button to validate that your configuration is functioning properly.

Network			:
WIFI	SMTP	NOTIFICATIONS	TELEMETRY
SMTP CONFIGURATION			
SMTP Server smtp.company	y.com	SMTP From eccellenzatouch@vkitech.com	
Use SSL	ication		
SMTP Username User 1234			
SMTP Password			
TEST CONFIGURA	NTION		

## **Online SMPT Server Providers**

If an SMTP server is not available through your IT Department or through your customer's IT Department, you may want to try using a public online SMTP server provider.

The following are just a few of the SMTP servers available online:

- smtp.gmail.com:587 Use SSL = YES, Request Authentication = YES
- smtp.mail.yahoo.com:587 Use SSL = YES, Request Authentication = YES
- smtp-mail.outlook.com:587 Use SSL = YES, Request Authentication = YES

Note that it is necessary to create an account with the provider you wish to use. Also note that the provider may impose limits and certain conditions.

#### Notifications

The **'Notifications'** screen is used to configure the Momentum<sup>™</sup> to send notifications concerning ingredient consumption, beverage sales, counters and faults/messages directly into your email's Inbox. Fault and message notifications are sent immediately after they occur so that they can be addressed as soon as possible to minimize downtime. Consumption, sales and counter notifications can be set to be sent on a daily (**at midnight**), weekly or monthly basis.

An SMTP server must first be configured to be able to use the 'Notifications' feature (<u>see page 60</u>).

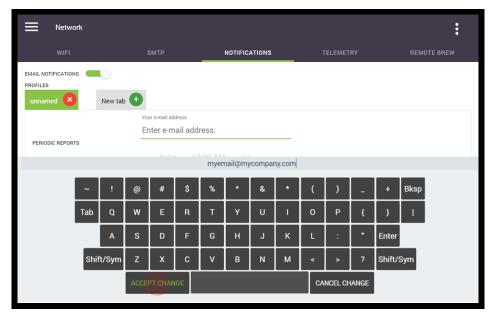

1. Tap on the 'Email Notifications' slider to activate this feature, and then t.

Network			:
WIFI	NOTIFICATIONS	TELEMETRY	REMOTE BREW
EMAIL NOTIFICATIONS PROFILES New tab			

2. Tap on the 'New Tab' and theen 'Enter Email Address' field to bring up the keyboard.

Network				:
WIFI		NOTIFICATIONS	TELEMETRY	REMOTE BREW
EMAIL NOTIFICATIONS	tab 🛨			
PERIODIC REPORTS	Your e-mail address Enter e-mail add	dress:		

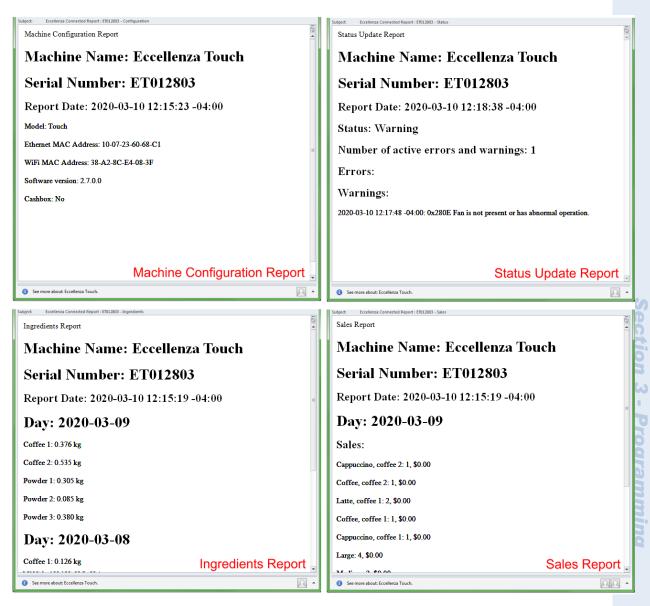

3. Type the email address to which the notifications will be sent, and press 'Accept Change'.

4. Set the time at which each type of notification is to be sent by tapping the respective time field and adjusting it accordingly.

Network				:
WIFI		NOTIFICATIONS		REMOTE BREW
EMAIL NOTIFICATIONS	New tab 🛨			
PERIODIC REPORTS	Your e-mail address myemail@my Sales Ingredients Configuration	ycompany.com 12:00 AM daily 12:00 AM daily 12:00 AM daily		
	Status	Sent when machine state changes	: 1 per minute	

The following are some examples of the types of reports that are sent to the email address(es) entered:

## Telemetry

The **'Telemetry'** option (if activated) provides an essential link between your machine and the online Eccellenza Connected Telemetry Management System via cellular network. It allows you to monitor real-time sales and consumption for your VKI equipment using your computer Browser, without having to be on-site.

Please note that the Telemetry feature on the Eccellenza Momentum<sup>™</sup> only works if you have subscribed to VKI's Telemetry Management System. Please contact VKI Customer Service for pricing and details.

To configure the Telemetry feature, go to the "**Network**" section of the programming, select the "Telemetry" tab, and enable the "Telemetry" option.

Netwo	rk				:
WIFI		SMTP	NOTIFICATIONS	TELEMETRY	REMOTE BREW
Telemetry	<b>)</b>				
S	ales / Consumption	1:20 AM	daily		
	Status Update	0:20 AM	daily		
Ma	chine Configuration	3:20 AM	daily		
09:00:26 GMT-050	00 (Eastern Standard Tin	ie)			Diagnostic

Please note that once telemetry is enabled, it may take a few minutes for communication to be established with the cellular network.

Just like the email notifications, you can also set the times of day at which the three types of data are transmitted to your Eccellenza Connected dashboard.

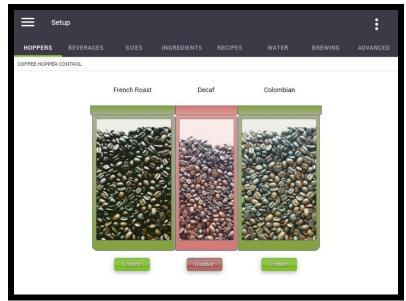

Telemetry and WiFi cannot be enabled at the same time – you must select one or the other, <u>after rebooting the machine</u>.

## Setup

The Setup screen is used to configure and rename products and beverages, set recipes and timings, set temperature, and perform product calibrations.

#### Hoppers

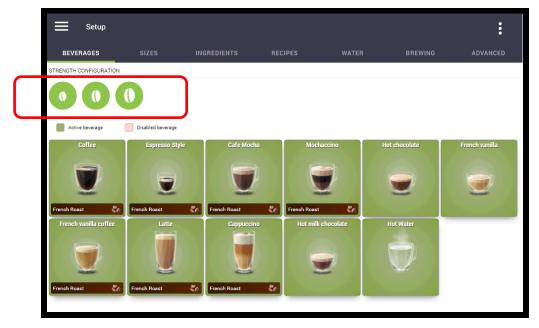

The Hoppers tab allows you to disable/enable (with a simple touch) any of the three coffee been dispensers if that particular blend is not used. If a coffee blend is disabled, the hopper color changes from green to red (decaf, in the example below), and that coffee type no longer appears on any of the beverages on the main selection screen.

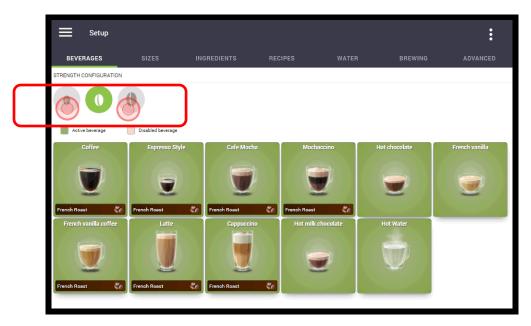

#### Beverages

#### Setting Cup Strength

The coffee strengths can be adjusted on the main screen of the '**Beverages'** menu. In the example below, all three coffee strengths are enabled (green).

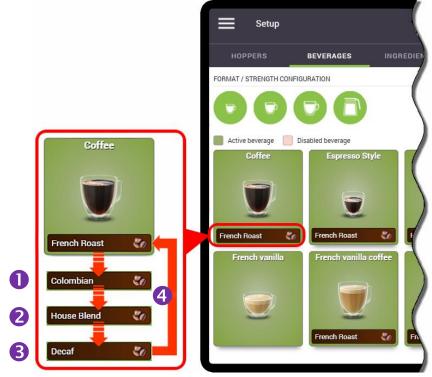

If, for example, you want to offer only medium strength, simply tap on the mild and strong strengths to disable them.

## Setting the Default Coffee Blend

While in the **'Beverages'** tab, you can set the default coffee type to be used for each beverage that uses coffee. By default, they are all set to "French Roast", as you can see in the image below.

The default coffee **must be set for each of the beverages independently**, as there is no global setting for this option. To change the default coffee blend, tap the blend shown beneath the beverage to cycle it to the next blend. Repeat the process until the required blend is displayed.

Repeat this procedure for any of the other beverage, if necessary.

## **Disabling Beverages**

While in the **'Beverages'** tab, you can also disable one or multiple beverages, if required. To disable a beverages, simply touch the image of the beverage on the screen, and the image background changes to **red**, indicating that the beverage is disabled. To re-enable the beverage, touch it once more – the background changes to green.

In the example below, the **Hot Chocolate** beverage is red, indicating that is has been disabled.

E Setup					:
HOPPERS BE	VERAGES SIZE	S INGREDIENTS	RECIPES	WATER BRE	WING ADVANCED
STRENGTH CONFIGURATI	ON				
	0				
Active beverage	Disabled beverage				
Coffee	Espresso Style	Cafe Mocha	Mochaccino	Hot chocolate	French vanilla
French Roast	French Roast	French Roast	French Roast	9	1
French vanilla coffee	Latte	Cappuccino	Hot milk chocolate	Hot Water	
French Roast	French Roast	French Roast		D	

The disabled product will no longer be offered on the main screen.

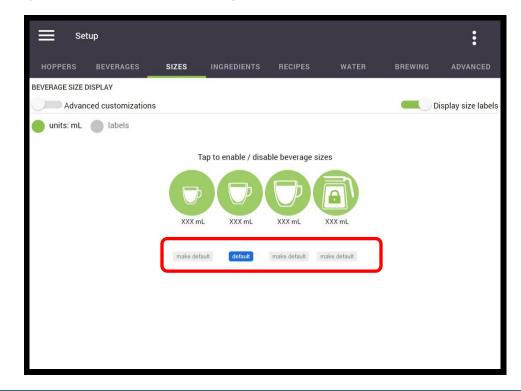

## **Configuring Cup Sizes**

Select the "Sizes" tab if you want to change the default cup size, select a pre-set cup size label, or customize the cup size label for a specific beverage or for multiple beverages.

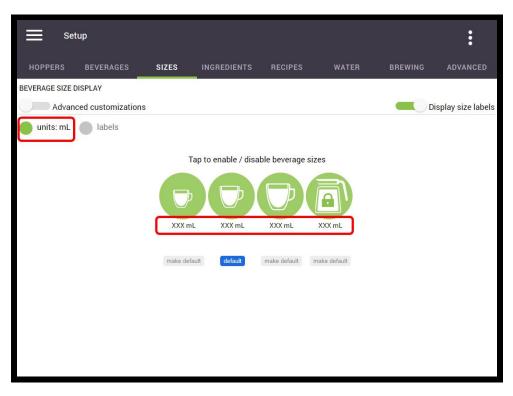

# Setting the Default Cup Size

The Medium cup size is the pre-set default cup size. If you want to set one of the other cups as the default cup size, simply tap the "Make Default" option under the required cup size. Note that it is possible to default to the Carafe option, if needed.

## Selecting and Customizing Cup Size Labels

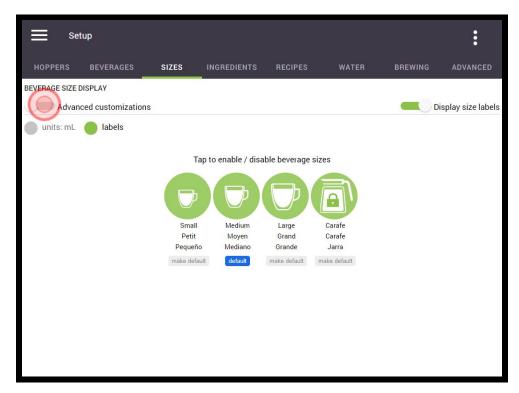

If the "**Units**" option is selected, the cup size labels will display the cup size volume, either in millilitres or by ounces, depending on the units setting in the 'Regional" tab under the 'General Settings' menu.

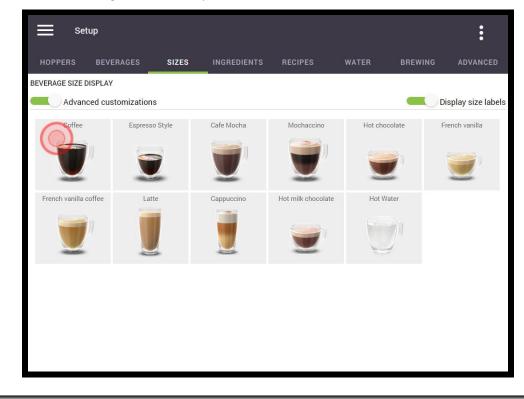

If the "Labels" option is selected, the cup size labels will display the pre-set cup size labels (Small, Medium, Large, Carafe).

Setup						:
HOPPERS BEVERAGES	SIZES	INGREDIENTS	RECIPES	WATER	BREWING	ADVANCED
BEVERAGE SIZE DISPLAY						
Advanced customizations					Di 🔍	isplay size labels
units: mL labels						
	Тар	to enable / disa	ble beverage	sizes		
	Small Petit Pequeño	Medium Moyen Mediano	Large Grand Grande	Carafe Carafe Jarra		
	make default	default	make default	make default		

To customize the cup size labels, touch to activate the "Advanced Customizations" slider.

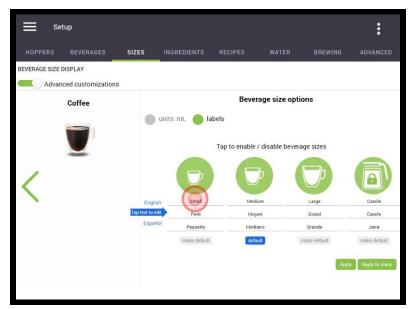

1. Select the beverage whose label you would like to customize.

Note that any changes made to this beverage can then be applied to multiple beverages at the end of this procedure.

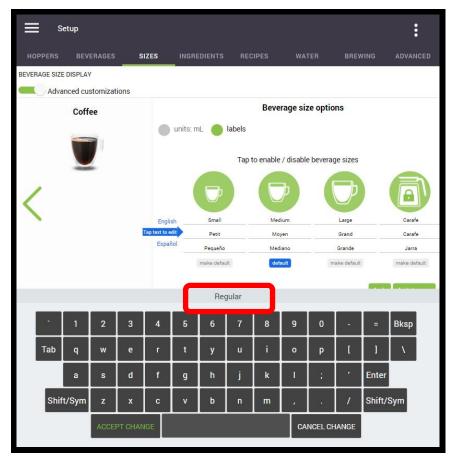

2. Select the existing label that you want to customize (cup size and language).

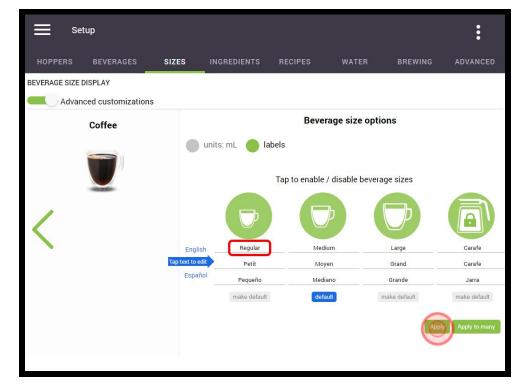

Note that you will need to manually customize the cup size label for each language being used. It will not change automatically.

3. Using the keyboard, change the name of the cup size label and then press "Accept Change". In this example, "Small" is being changed to "Regular".

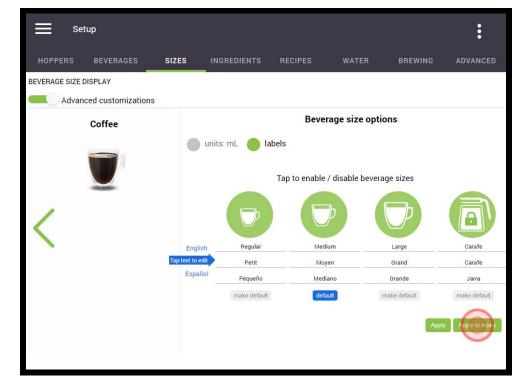

4. The changes made will now be visible on the main label screen. Tap on "**Apply**" to apply this change to this particular beverage.

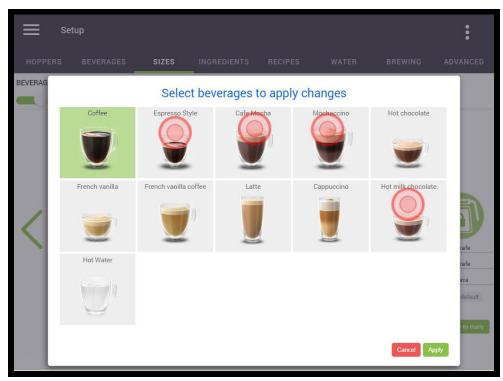

Once a label has been changed for one particular beverage, the same change can then be applied to multiple beverages without having to manually change each one.

5. To apply the change(s) you made to multiple beverage, tap on "Apply to Many".

6. The screen changes to show all of the available beverages. Tap all of the beverages for which you want the new labels you created to apply. The selected beverage backgrounds will change color to green (like the "Coffee" beverage in the image below).

7. Once you are done, tap on "Apply" to apply the changes made.

	Setup					0 0 0
HOPPEI		SIZES ING				
BEVERAG		Select be	verages to appl	y changes		
	Coffee	Espresso Style	Cafe Mocha	Mochaccino	Hot chocolate	
			<b>U</b>			
	French vanilla	French vanilla coffee	Latte	Cappuccino	Hot milk chocolate	
<					Ø	<b>D</b> rafe
	Hot Water				,	rafe
						default
					Cancel App	r to many

8. When you exit the programming mode, all of the custom labels that were created will be visible to the end-user.

# Configuring the Carafe

While in the **'Beverages'** tab, you can also configure the carafe option. Simply tap on the carafe icon to change its state.

- When the icon is greyed out, the carafe is disabled.
- When the icon is green, the carafe is enabled.
- When the icon is green with an image of a lock in the center, the carafe is active, but requires a PIN to be able to use it. *The PIN can be set in the "Security" menu.*

### Ingredients

Should you need to change the name of any of the coffee ingredients, it can be easily done in **'Ingredients'** tab. When this tab is selected, a list of the coffee and powder names is displayed. **Please note that only the coffee names can be changed (in all languages), if required.** 

The powder names cannot be changed. Changing the powder names in this menu will not change the powder names on the main screen.

HOPPERS	BEVERAGES	SIZES	INGREDIENTS	RECIPES	WATER	BREWING	ADVANCED

When the factory settings are restored for a selection, any changes that were made to your previous settings will be overwritten.

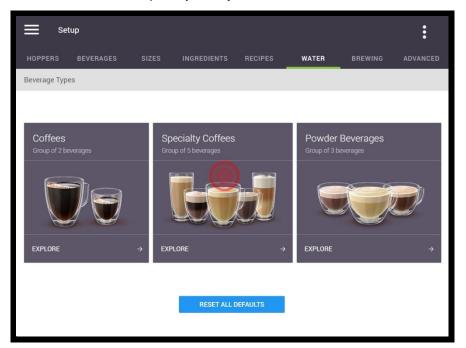

### Water

The water settings for every available beverage can be adjusted in the 'Water' tab of the setup.

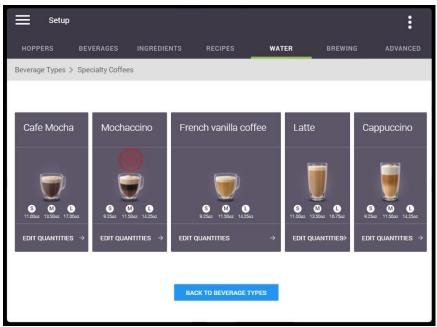

The Momentum<sup>™</sup> is factory preset to dispense 12-oz, 16-oz, and 20-oz cups sizes. These settings can be changed in this menu.

 After selecting the 'Water' tab, the following options appear - Coffees, Specialty Coffees, and Powder Beverages. Select the type of beverage for which you want to adjust the water. In this example, 'Specialty Coffees' is selected.

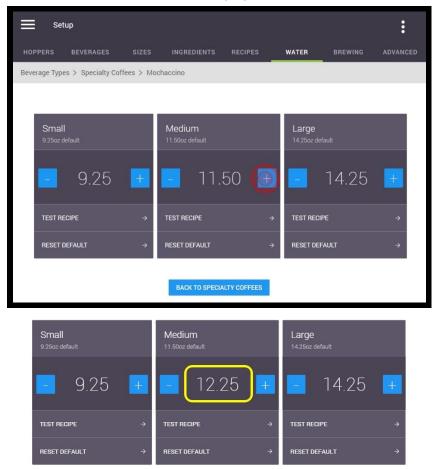

2. Select the **specific beverage** for which you want to adjust the water. In this example, **'Mochaccino'** is selected.

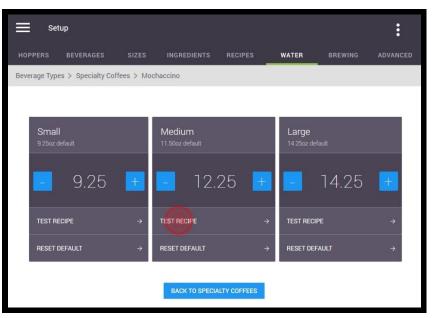

3. All three cup sizes are now displayed. To increase or decrease the quantity of water for a specific cup size, press the ' - ' or ' + ' buttons in the corresponding box.

In this example, the **'Medium'** cup size will be increased to 12.25-oz. Press the '+' button in the **'Medium'** box until **12.25** is displayed.

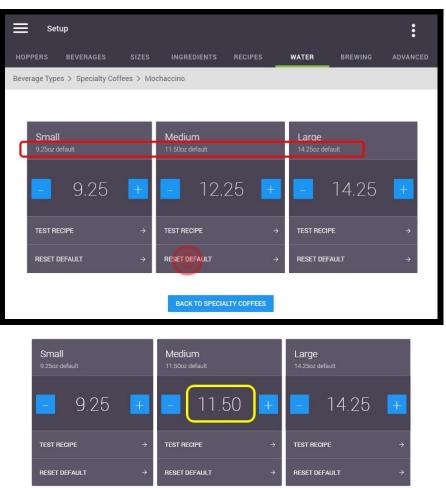

4. Place a cup on the cup stand and tap on the **'Test Recipe'** button to make a test vend with the new water settings. Make any adjustments, if necessary.

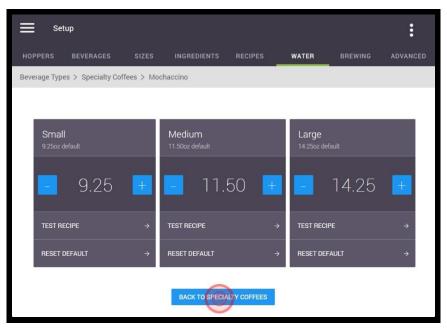

VKI Publication #202377-001

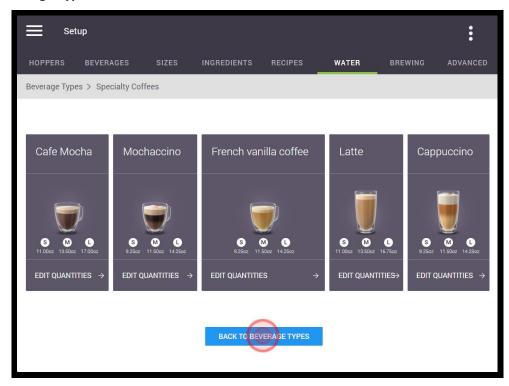

5. To reset a specific setting back to its default, press the '**Reset Default**' setting for the corresponding cup size. *The original default setting is shown beneath each cup size.* 

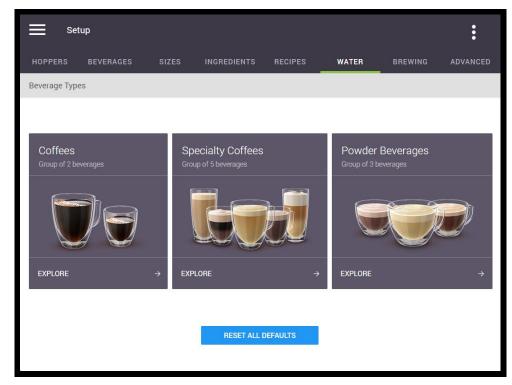

6. To return to the 'Specialty Coffees' screen, tap the 'Back to Specialty Coffees' button.

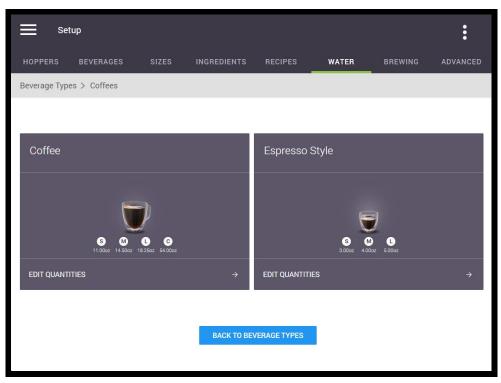

7. From this screen, either select another specialty beverage to adjust, or tap the 'Back to Beverage Types' button to return to the main screen.

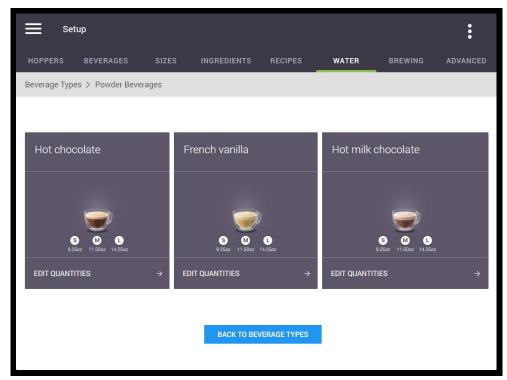

8. Make another selection and repeat the water adjustment process, if required.

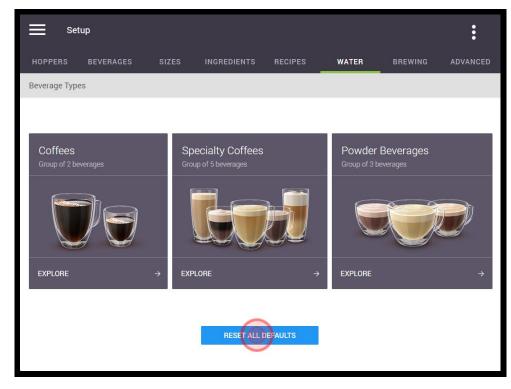

9. The following screen appears if **'Coffees'** is selected from the main screen:

10. The following screen appears if 'Powder Beverages' is selected from the main screen:

11. Should you need to reset all of the water settings back to their default settings at the same time, you can do so from the main 'Water' screen simply by tapping on the 'Reset all Defaults' button.

### Brewing

All water temperature related settings are set in this tab.

Set Set	up						:
HOPPERS	BEVERAGES	SIZES	INGREDIENTS	RECIPES	WATER	BREWING	ADVANCED
WATER TEMPERATI	URE						
VEND ENABL	E						
		Vend enable					
		185 °F					
SET POINT							
		Set point					
		198 °F					
			ed in the machine, s 95 °C / 204 °F	set the Set Point	to a value no		

#### Water Temperature

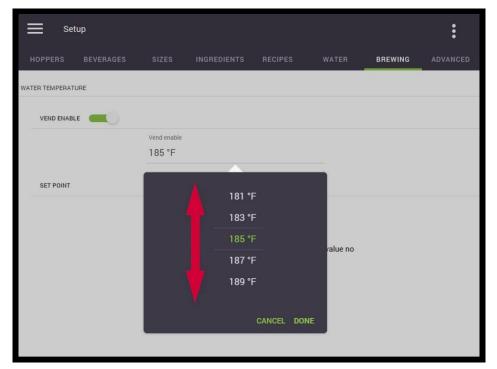

#### **Vend Enable**

By activating and setting the **'Vend Enable'** feature, you are setting the minimum temperature at which the machine will brew a beverage. Should the temperature drop below this setting, you will not be able to brew a beverage and the screen will display a 'Tank is Heating' message.

#### Set Point

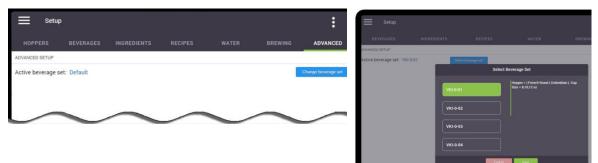

The **'Set Point'** is the temperature at which the heating system maintains the water in the tank.

To change either the 'Vend Enable' or 'Set Point' temperatures, tap on the temperature setting and use the scroll list to change the setting and press 'Done' to save it.

# Advanced (Beverage Set Selection)

In this tab, you can choose the beverage set (set of cup sizes) required by tapping the "Change Beverage Set" tab. Select the beverage set required (see list) and tap **'Save'**.

# Security

The Security screen is used to assign or change PIN numbers, and grant/remove access to individual sections of the machine programming.

There are two tabs on this screen - Administrator and Operator. The **Operator** is generally the owner of the equipment, and the **Administrator** is the person responsible for the equipment at the account. The Operator has complete access to the programming menus and sets the rights for the Administrator, who has limited access.

In the example below, you'll notice that the Administrator has only two accessible menus, while the Operator has access to all of the menus. It is the Operator who decides what access is granted to the Administrator, and in this case, the Administrator only has access to the Dashboard and General menus.

Coperator Logged on Thursday, December 13th 2018, 11:26 am	Administrator Logged on Thursday, December 13th 2018, 11:24 am
and Dashboard	and Dashboard

🔅 General	Power Settings
Power Settings	Vending
Vending	💉 Network
💉 Network	Security
🔧 Setup	💕 Maintenance
Security	
💕 Maintenance	
<b>∐</b> ⊳∄ Multimedia	

The information in the Operator section applies only to someone logged in as an Operator. If logged in as an Administrator, the Operator tab is not accessible to you.

#### Administrator

The Administrator can set or change their own PIN number in this tab.

The default pin for the Administrator is '234567'. We recommend that you change this pin on the machine's initial set-up. *Store the new PIN information somewhere where it can easily be found (in your customer's file, for example)!* 

1. Tap on 'New Pin' (or change PIN, if changing it) to open the numeric keypad.

ADMI	NISTRATOR	OPERATOR	
PIN MODIFICATION			
	New PIN		
CARAFE PIN			
	New PIN ******		

2. Using the keypad, enter a 4-6 digit PIN and tap on 'Accept Change'.

4. If the PINs matches, you will see a checkmark beside both entries to inform you that the new PIN has been accepted.

ADMINISTRA	TOR	OPERATOR	
IN MODIFICATION			
0	New PIN		
$\odot$	Confirm PIN		

After entering their PIN on the main screen, the Administrator will have access to the menus for which the Operator gave them the necessary permissions. In most cases, this access will be limited and some options will not be available.

#### Setting the Carafe PIN

To set or change the PIN for the carafe, tap the "New PIN" field beside "Carafe PIN", and follow the same procedure used to change the 'Administrator' PIN.

#### Note that the carafe PIN can only be 4 digits long.

CARAFE PIN	
New PIN	
	2

### Operator

The Operator can set or change their own PIN number in this tab, and can grant the necessary privileges (rights and access) to the Administrator.

The default pin for the Operator is '345678'. We recommend that you change this pin on the machine's initial set-up. *Store the new PIN information somewhere where it can easily be found (in your customer's file, for example)!* 

1. Tap on **'Current Pin'** to open the numeric keypad.

≡	Security			:
	ADMINISTRATOR	OPERATOR	-	
PIN MODIF	ICATIONS			
	Current PIN			
	TRATOR PRIVILEGES	Settings Vending/Pricing Networ		Maintenance

2. Using the keypad, enter your <u>current</u> PIN and then tap on 'Accept Change'.

#### **Administrator Priviliges**

4. The lower portion of the screen shows the 'Administrator Privileges'. By default, the Administrator is given access to all of the options (colored green).

$\sim$					CHANGE PIN	
ADMINISTRATOR PR	IVILEGES					
Dashboard	General	Power Settings	Vending/Pricing	Network	Security	Maintenance
				_		

5. To change these options, tap on the options that you want to make available to the Administrator (they will change color to green). To remove the availability of any options, tap them so that they are grayed out.

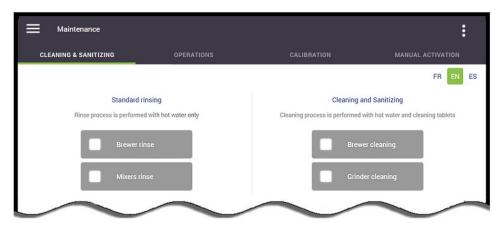

$\sim$			$\sim$		CHANGE PIN		
ADMINISTRATOR PR	IVILEGES						
Dashboard	General	Power Settings	Vending/Priving	Network	Security	Maintenance	
Ő.							1

In the screenshot above, in the 'Administrator Privileges' section you'll now notice that the 'Dashboard', 'General', 'Power Settings' and 'Maintenance' options are green. These are the updated options available to the Administrator. The grayed-out options will not be visible to the Administrator.

#### Maintenance

#### **Cleaning & Sanitizing Tab**

This tab provides access to maintenance-related options. The "Standard Rinsing" options are simply automated quick-rinse cycles for the brewer and for the three whippers. The "Cleaning & Sanitizing" cycles require the use of special cleaning products, therefore user intervention is required.

# **Standard Rinsing Section**

Place a large cup on the cup stand prior to running these cycles as up to 16-oz of water will be dispensed once the cycle is activated.

#### **Brewer Rinse**

The brewer rinse cycle dispenses water into the brewer as the piston repeatedly rises and lowers, creating agitation above and below the screen. This cycle is fully automated and does not require the use of any cleaning agents.

To manually run a brewer rinse cycle, tap the 'Brewer Rinse' option.

#### **Mixers** Rinse

This cycle cleans all three of the powder whipper systems by sending hot water through each of the whipper units, while at the same time activating each of the whipper motors.

To manually run a powder rinse cycle, tap the 'Powder Rinse'.

### **Cleaning & Sanitizing Section**

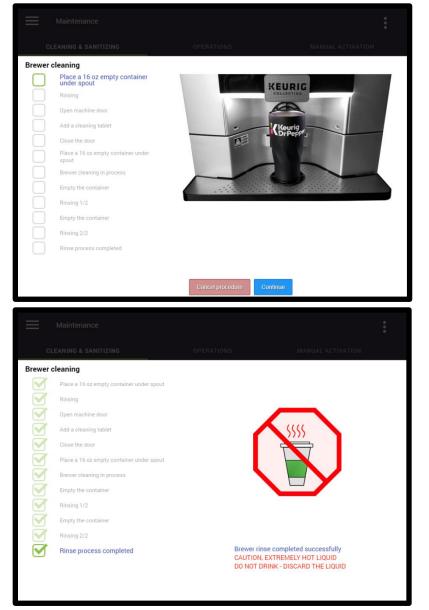

Place a large cup on the cup stand prior to running these cycles as up to 16-oz of water will be dispensed once the cycle is activated.

### **Brewer Cleaning**

The brewer cleaning cycle performs a thorough cleaning of the interior of the brewer, including the filter screen. This cycle is fully automated and requires the use of an **Urnex TABZ Z61** cleaning tablet and should be performed on a monthly basis, or more frequently if required.

To run a brewer cleaning cycle, tap the **'Brewer Cleaning'** option in the "Cleaning & Sanitizing" section of the screen and follow each of the steps that are displayed until the process is completed.

### **Grinder Cleaning**

The grinder cleaning cycle removes coffee oils and buildup from the grinder heads (burrs). This cycle requires the use of a cap full of the **Urnex SuperGrindz A01** cleaning pellets (26 grams / 115 pellets), and should be performed on a monthly basis, or more frequently if required.

To run a grinder cleaning cycle, tap the **'Grinder Cleaning'** option in the "Cleaning & Sanitizing" section of the screen and follow each of the steps that are displayed until the process is completed.

<image><image><text><text><text><text><text><text><text><text><text><text><text>

Please note that this cycle is not fully automated as the coffee dispenser needs to be removed and re-installed as part of this process.

# **Operations Tab**

This tab provides access to maintenance-related options.

Maintenance			:
CLEANING & SANITIZING	OPERATIONS	CALIBRATION	MANUAL ACTIVATION
_			
v	VIPER HOME POSITION	REMOVE FILTER	
CA	LIBRATE POWDER LEVEL		
		$\sim$	

# Wiper Home Position

This option reinitializes the brewer wiper to its home position (same procedure that occurs when the waste bin is removed and re-inserted).

# **Remove Filter**

This option causes the brewer piston to cycle all the way to the bottom of the cylinder, which will "pop" (unclip) the filter screen from the piston. The piston then moves to the top of the cylinder so that the filter screen can be easily retrieved.

# **Calibrate Powder Level**

This option automatically calibrates the powder motors and dispensers. Note that the machine comes pre-calibrated from the factory, therefore running this cycle is not necessary. Should you replace one of the powder motors or one of the powder dispensers, we recommend that you execute this calibration cycle.

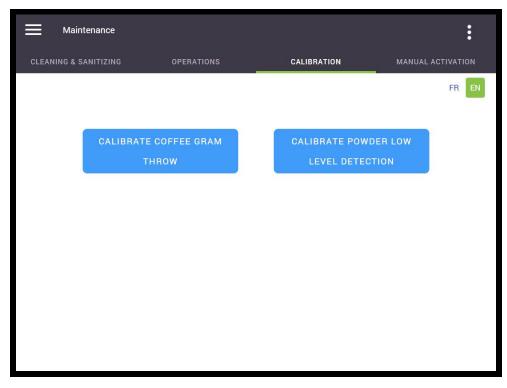

This cycle must be executed with <u>empty powder dispenser(s)</u>. Do not run this cycle if there is product in the powder dispenser(s) as the calibration will not be accurate and the whipper bowls will fill with powder.

After the cycle is finished, it takes several vends for the dispenser(s) to properly complete their calibration. The machine can be used normally throughout this brief period.

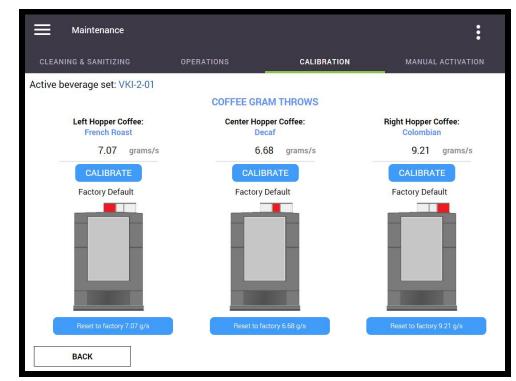

#### Calibration

The Calibration menu allows you to calibrate the coffee gram throws (individually for all coffee dispensers) and to calibrate the low powder detection level.

# **Calibrate Coffee Gram Throw**

1. Select the coffee dispenser to be calibrated.

- Maintenance **CLEANING & SANITIZING** OPERATIONS MANUAL ACTIVATION CALIBRATION CALIBRATING LEFT HOPPER WITH "FRENCH ROAST" COFFEE INSTRUCTIONS 1. Make sure you have AT LEAST 2 LB of French Roast coffee in the left hopper. 2. Make sure you have your SCALE, a small tray and a 12 oz paper cup ready. 3. Remove the waste bin and open the door. 4. Press on the "SETUP DONE" button. 5. Place the empty cup on the scale and tare (zero) the scale. 6. Place the tray under the grinder chute. 7. Press on "EMPTY" button to prime the grinder and discard the contains. 8. Place the tray under the grinder chute prior to each of the next 3 steps. 9. Press on the "START 1/3", then empty the contains from the tray into the cup on scale. SETUP DONE BACK
- 2. Follow the prompts and step-by-step instructions that are displayed on the screen.

- 3. Touch 'Setup Done' once complete to return to the main Calibration screen.
- 4. Repeat for the other coffee dispenser(s) if required.

# **Calibrate Powder Low Level Detection**

This option automatically calibrates the powder motors and dispensers to detect when the powder lever is too low and requires refilling. Note that the machine comes pre-calibrated from the factory, therefore running this cycle is not necessary. Should you replace one of the powder motors or one of the powder dispensers, we recommend that you execute this calibration cycle.

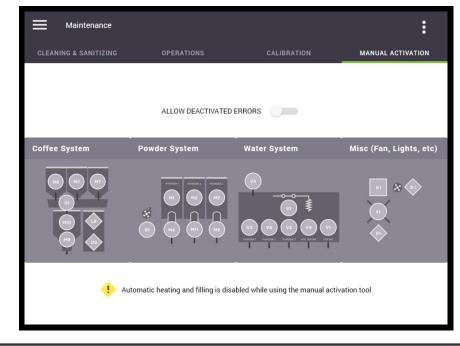

This cycle must be executed with <u>empty powder dispenser(s)</u>. Do not run this cycle if there is product in the powder dispenser(s) as the calibration will not be accurate and the whipper bowls will fill with powder.

After the cycle is finished, it takes several vends for the dispenser(s) to properly complete their calibration. The machine can be used normally throughout this brief period.

#### **Manual Activation**

The Manual Activation screen allows you to test individual components to ensure they are functioning properly. The main screen outlines all of the systems within the Momentum<sup>™</sup>. Once the main system is selected, any of the components within this system can then be selected.

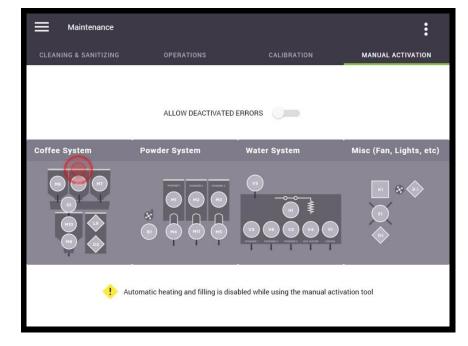

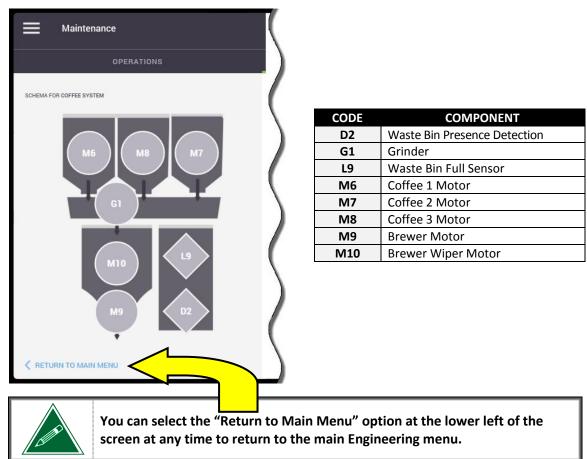

When testing components in this menu, note that only one component will activate at any given time. This is extremely important to remember when testing coffee or powder dispenser motors, as well as outlet valves.

# **Coffee System**

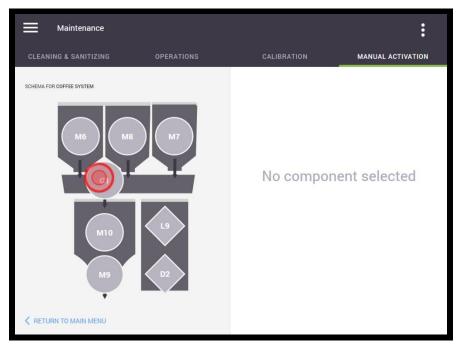

In the following example, the component to be tested is the **bean grinder**. First, select the main system, which in this case is the "Coffee System".

A new screen now appears showing all of the components that are part of the Coffee System. Each component is identified by a unique component code.

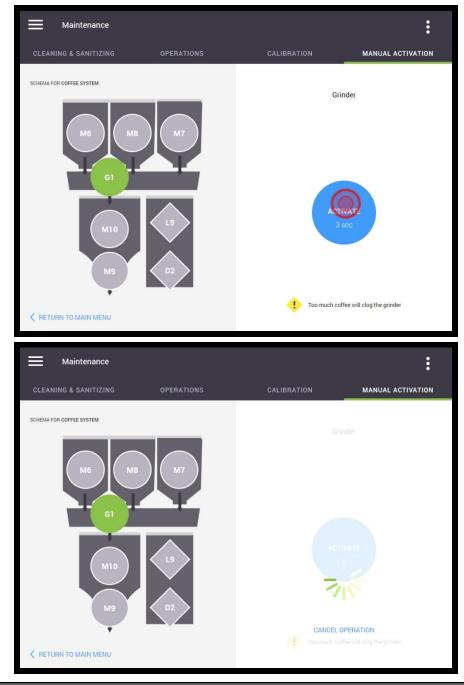

Select the component to be tested by tapping on it on the screen (in this example, the component is the grinder – G1).

The testing options now appear on the right section of the screen. In this example, the only option available is to activate the grinder for 3 seconds.

Tap the "Activate" button and the grinder (only) will energize for 3 seconds.

O

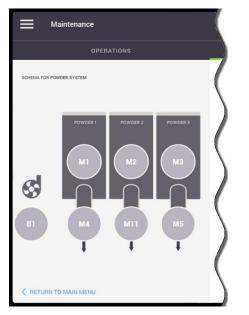

It is extremely important to note that when testing the coffee motors (M6, M7 or M8), <u>ONLY</u> the coffee motor will activate. Coffee beans will be dispensed into the grinder but the grinder, or any other component, will <u>NOT</u> activate.

When testing the Waste Bin Presence (D2) or Waste Bin Full (L9) sensors, a voltage level and the bin's status (present or absent) are displayed on the screen.

Powder System

If the Powder System is selected from the main Engineering screen, the following component options appear for testing:

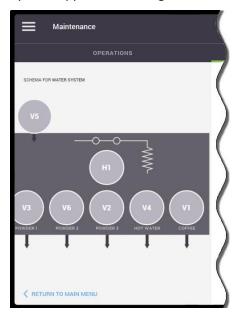

CODE	COMPONENT	
B1	Blower (Powders)	
M1	Powder 1 Motor	
M2	Powder 2 Motor	
M3	Powder 3 Motor	
M4	Powder 1 Whipper Motor	
M5	Powder 3 Whipper Motor	
M11	Powder 2 Whipper Motor	

 $\bigcirc$ 

It is extremely important to note that when testing the powder motors (M1, M2 or M3), <u>ONLY</u> the powder motor will activate. Powder will be dispensed into the whipper but the whipper motor and powder valve, will <u>NOT</u> activate.

## Water System

If the Water System is selected from the main Engineering screen, the following component options appear for testing:

CODE	COMPONENT	
H1	Heating Element	
V1	Coffee Valve	
V2	Powder 3 Valve	
V3	Powder 1 Valve	
V4	Hot Water Valve	
V5	Inlet Valve	
V6	Powder 2 Valve	

CAUTION: Extremely hot water will be dispensed when testing any of the outlet valves! Please note that the coffee valve (V1) will dispense water directly into the brewer, but the brewer will not activate.

**Miscellaneous Components** 

appear for testing:

Maintenance = SCHEMA FOR MISCELLEANOUS 0 K RETURN TO MAIN MENU

CODE	COMPONENT	
D3	Door Open Detection	
D6	Cup Detection	
К1	Exhaust Fan	
\$1	Cup Lighting	

If Miscellaneous is selected from the main Engineering screen, the following component options

### Multimedia

The Multimedia screen is used to configure the images or the videos that are played when a specific beverage is being prepared. Each beverage can be configured independently, if you so choose.

### System Default

With this option selected, the factory pre-set default images and videos will be used during the beverage preparation process.

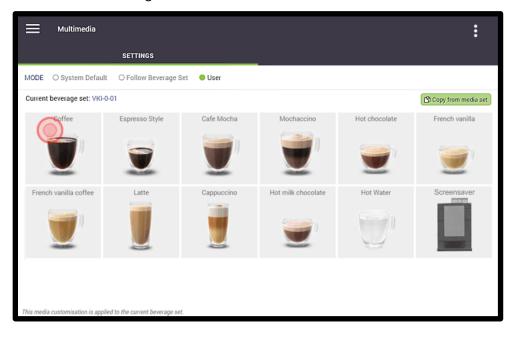

### Follow Beverage Set

With this option selected, the pre-set 'Beverage Set' images and videos that are associated with the active beverage set (if applicable) will be used during the beverage preparation process.

#### User

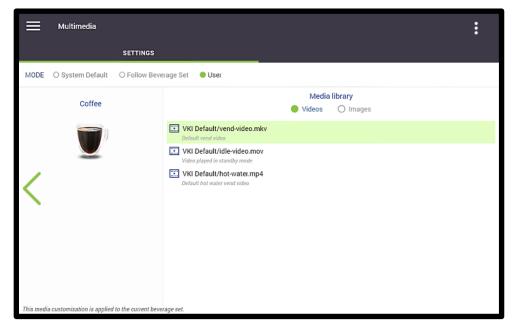

With the **'User'** option, you can select an image or video to play as a screensaver or to play when a specific beverage is being prepared. Each beverage can be configured independently, if you so choose.

To associate an image or a video to a specific beverage, or to set the screensaver:

1. Select the desired beverage.

2. From the list, select the video you wish to play during the preparation of the selected beverage.

3. To select an image instead of a video, tap on the "**Image**" button and select the desired image from the list.

≡	Multimedia		:
		SETTINGS	
MODE	O System Default	O Follow Beverage Set 🛛 🔴 User	
	Coffee	Media library Videos Images	
		VKI Default/background.png Background image for vend	
<			
This media	a customisation is applied	I to the current beverage set.	

If you have loaded custom videos or images that were created for you by VKI, they will be integrated into the Media Library and they will appear on the list(s) in steps #2 and #3 above.

## Copy from Media Set

This option allows you to globally set the images and videos that appear during the beverage preparation process. It is normally set to use the 'VKI Default' media. However, If you have loaded any custom media, you can switch to it using this option.

- Multimedia SETTINGS MODE O System Default O Follow Beverage Set User 🗅 Copy from media set Current beverage set: VKI-0-01 Coffee Espresso Style Cafe Mocha Mochaccino Hot cho French vanilla coffee Hot milk chocolate Hot Water dia customisation is applied to the current beverage se
- 1. Tap the 'Copy from Media Set' button on the top right of the screen.

- 2. From the list that appears, select the option you require.
  - a. If you have loaded custom media into the machine, select the **'Custom'** option.
  - b. If you want to display the factory pre-loaded media, select the **'VKI Default'** option.

3. Tap 'Done' and the media set that was selected will then be loaded into the machine.

#### **Requesting Custom Images or Videos**

To place an order for your custom image and/or video file, you need to send your image/video file (meeting the criteria outlined below) to <u>tech.support@kdrp.com</u>. We will configure the necessary files package that will enable you to load your custom image and/or video into the machine and we will provide you with a download link to access it.

#### **Multimedia Specifications**

The images or videos that appear during the beverage preparation process must meet the following specifications:

#### Images:

Format:	<b>.PNG</b> Non-interlaced, sRGB, 8 bits per pixel
File Name:	The file must be named as you want it to appear in the Multimedia menu.
Dimensions:	1080 pixels x 1920 pixels
Note:	The progress bar occupies the bottom 22 pixels of the screen.

#### Videos:

Format:	.MKV
File Name:	The file must be named as you want it to appear in the Multimedia menu.
Encoding:	H.264
<b>Resolution:</b>	720 x 1280
Frame Rate:	24 FPS
Audio:	These must be <b>no audio</b> on the video.
Note:	The progress bar occupies the bottom 80 pixels of the screen.

Once you have downloaded the .ZIP file from the link that was sent to you:

- 1. Double-click the .ZIP file to open it.
- 2. Copy the contents on the .ZIP file directly onto a blank USB flash drive.
- 3. Insert the USB flash drive into the USB port on your machine and reboot the machine using the power switch.
- 4. The files will automatically load into the machine. Once done, you will be prompted to remove the USB flash drive, at which point the machine will reboot itself automatically and the files will be loaded.
- 5. Configure your media settings as outlined earlier in this Multimedia section of the manual.

# **Care and Maintenance**

To keep the Eccellenza Momentum<sup>™</sup> running efficiently and at peak performance, the following maintenance procedures must be performed at their specified intervals. It is recommended that equipment maintenance be scheduled at a time that would be the least disruptive to your customers. Whenever possible, replace the components requiring maintenance with new or refurbished ones, and then refurbish the older components at your shop.

Failure to perform the required care and maintenance will result in poor beverage quality and will lead to equipment malfunctions. It may also void any remaining warranty on the equipment and its components.

## **Daily Care**

- **Empty the Cup Stand** empty the contents of the cup stand and rinse the stand and grill under clean running water.
- **Empty the Waste Bin** *empty the contents of the waste bin.*
- Refill the Coffee Dispensers and Powder Dispensers top off the coffee and powder dispensers. Do not pack the products into the dispensers!
- ► Wipe Exterior and Countertop using a clean towel, wipe any coffee grounds and spills from the exterior of the machine, and from the countertop on which it sits.

### Every 1-2 Weeks

- Clean the whipper components for detailed information about disassembling and cleaning the whipper components, consult the Momentum<sup>™</sup> Service Manual (VKI Publication #202378-001).
- Inspect Water Hoses and Tubing inspect all plumbing connections, water hoses, tubing, clamps, fittings and water related components (valves, water tank, etc.) for signs of wear or damage. Replace them, if required.

### Every 15,000 Cycles or 12 Months

- Inspect Electrical Wiring and Components inspect all of the equipment wiring, terminals, connectors and electrical components (valves, motors, relays, element, etc.) for signs of wear, damage or overheating at connection points. Replace them, if required.
- Clean the whipper hoses remove all three whipper outlet hoses and thoroughly clean the exterior and the interior of each of the hoses. A plastic bristled brush must be used to clean the interior of the hoses.

• **Replace whipper seals** - replace the rubber seals on all three whipper bases.

Replace Brewer Seals and Gaskets - there are several seals and gaskets located throughout the brewer assembly that need to be replaced every 12 months or 15,000 cycles. The brewer 'Yearly Maintenance Kit' contains everything required.

• Clean the remaining brewer components with warm water.

### **Every 3 Years**

**Replace the following:** *heater element, thermal cut-off switch, all seals and gaskets and o-rings.* 

### Miscellaneous

- Run the Brewer Rinse and/or Powder Rinse Cycles when prompted by the machine (a message appears on the touch screen).
- Run the Brewer Cleaning cycle using the Urnex TABZ Z61 cleaning tablets see page 93.
- Run the Grinder Cleaning cycle using the Urnex SuperGrindz A01 cleaning pellets see page 93.
- Verify Water Tank Components dependant on the local water conditions, inspect, clean or replace components, as required.
- Clean the Side Exhaust Fan over time, dust will accumulate on the exhaust fan on the right side wall and it must be cleaned to maintain the fan's performance.
- Cleaning the Coffee Dispenser empty, remove, and clean the coffee dispenser with warm water and dish soap. Thoroughly dry the dispenser before re-installing it. For detailed information about removing the coffee dispenser, consult the Momentum<sup>™</sup> Service Manual (VKI Publication #202378-001).
- Cleaning the Powder Dispensers empty, remove, and clean the powder dispensers with warm water and dish soap. Thoroughly dry the dispensers before re-installing them. For detailed information about removing the powder dispensers, consult the Momentum<sup>™</sup> Service Manual (VKI Publication #202378-001).
- Inspect the grinder to prevent the grinder from jamming, re-adjust the grinder heads if the coffee grounds are too fine, and keep the grinder chute clean.

Failure to perform the required care and maintenance will result in poor beverage quality and will lead to equipment malfunctions. It may also void any remaining warranty on the equipment and its components.

	Water Tank Heater Over Current StandBy	Heater current has exceeded the configured stand by operation level.	1 - Clears automatically. If not, reboot the machine.

# **Updating Firmware**

<u>Never</u> attempt to install an older version of software than the version currently installed in your equipment as <u>it is not backwards compatible</u>! This may result in a failure of the HMI (touch screen) and void its warranty.

Firmware updates may be released periodically for the Eccellenza Momentum<sup>™</sup>. These updates may consist of fixes, new options and features, customizations, etc. This section guides you through the simple process of updating your equipment to the latest firmware.

After replacing the control board, the firmware must be loaded when the machine is first powered up. <u>Do not power up the machine</u> until the USB Flash drive with the proper firmware is connected to the machine.

- 1. Load the latest firmware files onto an **<u>empty</u>** USB flash drive (minimum **8GB**).
- 2. Open the front door.
- 3. Remove the plug from the USB connector and insert your USB flash drive into it. *Make sure to push the USB flash drive into the USB connector as far as it can go.*

- 4. Reboot the machine using the main power switch (switch the power off for 5 seconds and then on again).
- 5. Select either the 'Upgrade' option (for machines with 3.0 software or higher) or the 'Fresh Install' option to wipe the exisating software and settings, and reload the factory settings.
- 6. The updating process is automated and requires no user input. The screen reverts to command-style prompts that provide progress information on the update.

Dome at 1970-01-01 00:07:21 in 7.3 minutes, without warnings or errors. Saving logs in 'log_61_1970-01-01_90-00-03.txt', please wait a few seconds	
Please remove the USB key to reboot properly	

7. Once the update is complete (it may take up to 30 minutes), you are prompted to remove the USB flash drive to reboot the machine.

Remove the flash drive and the Eccellenza Momentum<sup>™</sup> will reboot itself twice. While it is rebooting, re-install the plug onto the USB connector and re-install the waste bin.

If the screen remains black with a "log-in" prompt, allow the machine sit undisturbed for 15 minutes or so as the upgrade may still be in progress in the background.

8. It is possible that an error may be displayed on the screen after the reboot. If this is the case, simply clear the error.

If the update process was interrupted prior to completion, you must connect the USB flash drive to a computer, and delete the "<u>Backup</u>" folder that was created, otherwise further updates will not be possible with this flash drive.

Updating the Eccellenza Momentum<sup>™</sup> firmware will <u>not</u> overwrite or change any existing settings or customizations you may have made in the programming. These settings will be maintained.

# **Installing the Card Reader Option**

The Eccellenza Momentum<sup>™</sup> is compatible with the most popular card reader options available – the **Coinco<sup>®</sup> Iris, Nayax<sup>®</sup> VPOS or USA Technologies<sup>®</sup> G9** card readers.

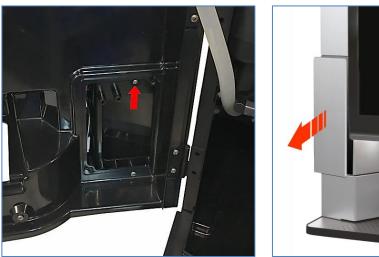

# *Please note that VKI Technologies does not provide the card reader hardware, or the service – they must be purchased from one of the suppliers listed above.*

Depending on the type of card reader to be used, you'll need to purchased the compatible door cover from VKI Technologies. See step #5 for more details.

1. With the front door open, remove the two screws securing the small panel to the inside of the door, and then remove the panel and set it aside.

2. Remove the screw at the top center of the opening, and then remove the original full cover from the outside of the door.

KEURIG

3.

Partially insert the two lower screws at the card reader opening on the front of the

door. Do not tighten these screws at this point.

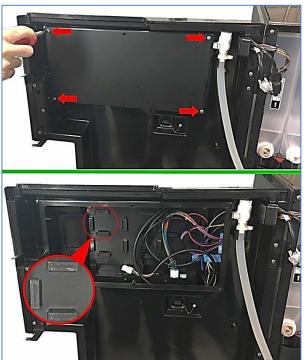

4. Pass the card reader wiring to the rear of the door (through the card reader opening), and then slide the bottom of the card reader onto the two partially inserted screws. Once done, secure the top of the card reader with two screws, and then tighten the two lower screws to secure the bottom of the card reader.

5. Install the appropriate cover (for card reader being used) onto the front of the door, and secure it in place with a screw from the inside of the door (at top center of card reader opening).

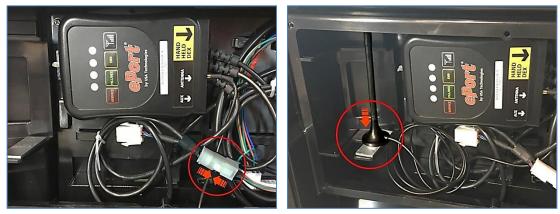

6. Remove the inner access panel at the top of the door (4 screws). This exposes several wire-tie anchor points, onto which the card reader control module will be installed.

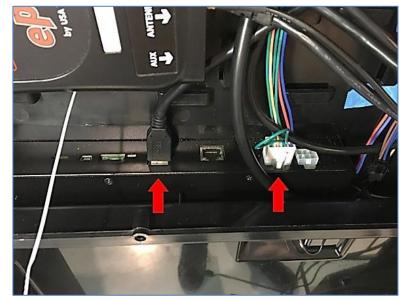

7. Secure the card reader module using wire-ties to <u>at least two</u> of the anchor point in the door. The installation location may vary depending on the model of card reader used.

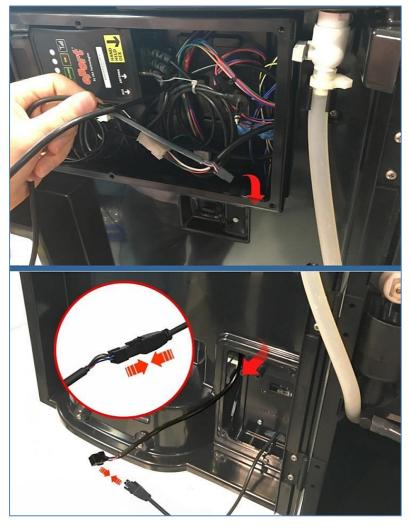

8. Connect the 6-pin male MDB connector from the card reader, to the 6-pin female MDB connector on the door wiring, and then install the magnetic antenna onto the metal plate to the left of the control module.

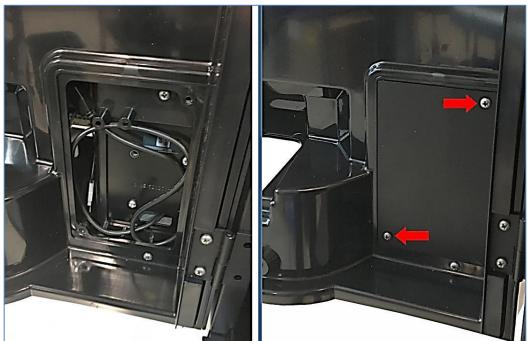

9. Before proceeding, ensure that the USB cable and the door wiring harness are still connected to the locations shown.

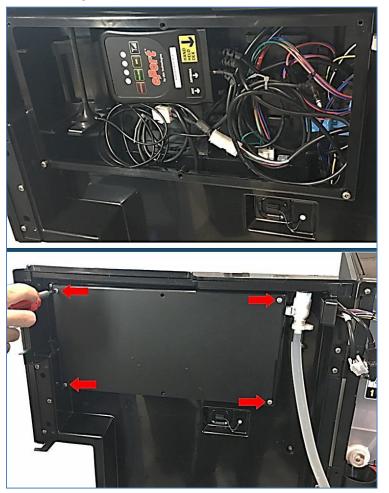

10. Pass the wiring cable with the small black connector through the channel at the top of the door, to the bottom of the door where the card reader is located, and then connect it to the cable on the card reader.

11. Bundle and stow any excess wiring inside the opening for the card reader (at the bottom of the door) and reinstall the cover using two screws.

12. Bundle and stow any excess wiring inside the opening at the top of the door, and reinstall the cover using four screws .

- 13. Enable the "Card Reader" option in the Momentum<sup>™</sup> programming.
  - a) Enter the "Programming" Mode (see page 23).
  - b) Select the "Vending" Menu (see page 47).
  - c) In the "General" tab, enable 'Vending Mode' and enable 'Cashless' (the sliders for both must be green).

The card reader will now be functional, assuming you have subscribed to, and activated the service with the card reader provider.

Please note that Keurig does not offer the card reader hardware, nor do we provide the card reader service. You will need to contact one of the approved card reader suppliers (Coinco, Nayax, USA Technologies, SEM) for more details.

# **Product Warranty Information**

**Important note:** The serial number of the machine must be reported at the time a warranty claim is submitted on a machine or any of the components contained therein. Any removal of or tampering with the serial number or date code of a component will void warranty.

### Limited One-Year Warranty

Keurig Green Mountain, Inc. warrants to the original purchaser that its coffee maker will be free of defects in materials or workmanship under normal use for one-year from the date of purchase. Keurig, a Keurig Authorized Distributor or Service Agent will, at their option, repair or replace a defective coffee maker or coffee maker parts under this warranty without charge upon its receipt of proof of the date of purchase. If a replacement coffee maker is necessary to service this warranty, the replacement coffee maker may be new or reconditioned. If a replacement coffee maker or parts are sent, a new limited one-year warranty will be applied to the replacement coffee maker or parts. This warranty only applies to coffee makers operated in the United States and Canada. This warranty gives the original purchaser specific legal rights, and you may also have other rights that vary from state to state and, in the case of Canada, from province to province. If you obtained this coffee maker through sale or rental from a Keurig Authorized Distributor, you may also want to refer to your distributor's warranty policies. Only the use of Keurig® accessories will guarantee the proper functioning and lifetime of Keurig® accessories may not be covered by this warranty or may result in a service fee if the damage or malfunction is determined to be caused by such use.

### What is not covered by the Limited Warranty?

THIS WARRANTY DOES NOT COVER CONSEQUENTIAL OR INCIDENTAL DAMAGES SUCH AS PROPERTY DAMAGE AND DOES NOT COVER INCIDENTAL COSTS AND EXPENSES RESULTING FROM ANY BREACH OF THIS WARRANTY, EVEN IF FORESEEABLE. Some states or provinces do not allow the exclusion or limitations of incidental or consequential damages, so the above limitation or exclusion may not apply to you depending on the state or province of purchase. Nor does this warranty cover damages caused by use of non Keurig<sup>®</sup> accessories, services performed by anyone other than Keurig or its authorized service providers, use of parts other than genuine Keurig parts, or external causes such as abuse, misuse, inappropriate power supply, or acts of God.

### **Other Limitations**

THIS WARRANTY IS EXCLUSIVE AND IS IN LIEU OF ANY OTHER EXPRESS WARRANTY, WHETHER WRITTEN OR ORAL. IN ADDITION, KEURIG HEREBY SPECIFICALLY DISCLAIMS ALL OTHER WARRANTIES WITH RESPECT TO YOUR ECCELLENZA MOMENTUM™ COFFEE MAKER, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. Some states or provinces do not allow disclaimers of such implied warranties or limitations on how long an implied warranty lasts, so the above limitation may not apply to you depending on the state or the province of purchase.

#### How do you obtain warranty service?

Keurig<sup>®</sup> coffee makers are high-quality appliances and, with proper care, are intended to provide years of satisfying performance. However, should the need arise for warranty servicing; simply call your Keurig Authorized Distributor (KAD) who originally sold you the coffee maker or your Keurig Authorized Service Provider (KASP) for full support. To be re-connected with your KAD or KASP, please call Keurig at 1.888.287.2739 ex.5. If in Canada, please call: 1.888.382.1145.
